Medical professionals at University of New Hampshire Telehealth Practice Center in Stafford County, New Hampshire will deliver virtual reality-based tele rehabilitation to five locations benefitting 69,800 individuals.
MI	Elkton-Pigeon-Bay Port Laker Schools	\$848,720	This Rural Development investment will be used to equip eight hub sites and seven end-user sites throughout Huron & Clare counties in northeast Michigan with distance learning equipment. Instructors at Laker Schools, Huron Area Technical Center, Tom Smaglinski and Sons Farm, Mid Michigan Community College, and FFA Alumni Association Barn in Huron and Clare counties will deliver college courses, Spanish courses, cultural exchanges, and virtual field trips to seven locations.

Distance Learning and Telemedicine Grants FY 2023 application window

State	Recipient	Grant Amount	Project Description
MI	Gogebic Community College	\$121,752	This Rural Development investment will be used to equip two hub sites and seven end-user sites throughout Gogebic, Houghton, Ontonagon, and Baraga counties in Northwestern Michigan with technology-enhancing classroom equipment for a designated learning space. Instructors at Gogebic Community College in Gogebic County, Michigan and Gogebic Community College - Copper Counter Center in Houghton County, Michigan will deliver introductory-level computer science, healthcare program, other degree programs and standalone elective courses to seven locations.
MI	Great Lakes Recovery Centers, Inc.	\$193,983	This Rural Development investment will be used to equip 23 hub/end-user sites in 17 counties throughout Michigan with servers, computers, monitors, VOIP, laptops and Doxy software. Medical professionals at Great Lakes Recovery Centers, Addiction Treatment Services, Harbor Hall, Phoenix House and Ten16 Recovery Services will deliver substance use disorder and behavioral healthcare treatment services to 23 locations benefitting 2,500 individuals.
MN	East Central Minnesota Educational Cable Cooperative	\$187,206	This Rural Development investment will be used to equip 16 hub/end-user sites throughout Chisago, Douglas, Isanti, Kanabec, Mille Lacs, Pine and Stearns counties in Central Minnesota with high quality video equipment designed to support fully interactive teaching and learning. Instructors from several school districts and Community and Technical College in Chisago, Douglas, Isanti, Kanabec, Mille Lacs, Pine and Stearns counties in Minnesota will deliver high school and college credit courses in world/native languages, college general education and career/technical education to 16 sites.
MN	Warren Community Hospital, Inc.	\$837,000	This Rural Development investment will be used to equip one hub site and two end-user sites throughout Marshall County in northwestern Minnesota with telehealth platform equipment. Medical professionals at North Valley Health Center in Marshall County, Minnesota will deliver clinic-based medical services to two locations.
MO	Bates County Memorial Hospital	\$867,621	This Rural Development investment will be used to equip one hub site and five end-user sites throughout Bates County, Missouri with Tela Doc Health Robots, tablets, and software. Medical professionals at Bates County Memorial Hospital in Bates County, Missouri will deliver robust medical services to five locations.
MO	North Central Missouri College	\$807,266	This Rural Development investment will be used to equip one hub/end-user site at the main campus of North Central Missouri College (NCMC) in Grundy County, Missouri with distance learning classroom equipment. Instructors at NCMC will be able to deliver mathematics, science, liberal arts, criminal justice, and other courses to multiple external remote locations in its service area.
MO	Thayer R-II School District	\$289,369	This Rural Development investment will be used to equip six hubs/end-user sites throughout Oregon County and Shannon county in the southern portion of Missouri with mobile distance learning carts and telemedicine equipment. This investment will provide students access to more course offering and allow advanced students access to more rigorous courses. Further, the technology will facilitate health care access for students at Couch K12 school which will address the lack of providers in the area. While the number of individuals to be served in each community would be small at any given time, having access to a simulcast option of a GED program from a larger town in the region during evening hours on any of our campuses without the associated travel costs or time for working adults could be invaluable in helping those individuals complete a GED program.

Distance Learning and Telemedicine Grants FY 2023 application window

State	Recipient	Grant Amount	Project Description
MO	University of Missouri System dba Curators Of The University	\$552,508	This Rural Development investment will be used to equip four hub sites, three hub/end-user sites and 13 end-user sites with computer, video and support equipment throughout the following Missouri counties: Boone, Jackson, St. Louis, New Madrid, Lawrence, Gentry, Crawford, Knox, Linn, Howard, Grundy, St. Genevieve, Perry, Morgan, Dallas, and Howell & Hickory. Instructors at the University of Missouri system sites in Boone, Jackson and St. Louis counties in Missouri will deliver Scientific, Technical, Engineering and Mathematics courses to 16 system locations.
MO, OH, WV	Jefferson County Joint Vocational School	\$854,842	This Rural Development investment will be used to equip five hub sites and one end user site throughout St. Louis County, Missouri; Jefferson and Mahoning counties, Ohio; and Ohio County, West Virginia, with interactive video conferencing systems. Instructors at St. Louis University School of Medicine, Jefferson County Sheriff's Department, Salon Centric, West Virginia Northern Community College and Jefferson County Vocational School will deliver science, technology, engineering, and math educational coursework and job ready skills to one location benefitting 362 students.
MS	Benton County School District	\$822,984	This Rural Development investment will be used to equip four hub sites and five end-user sites throughout Benton County in Mississippi with tele-video and tele-educational equipment to implement interactive distance learning systems in end-user school classrooms. This will allow students to connect in real-time to special educators, counselors, and other remote classrooms. Instructors at Benton County School District facilities in will deliver virtual enhanced learning in dual credit classes, STEM, languages, and courses that are not available without telecommunications equipment including mental health counseling to five locations.
MS	County of Marshall dba Marshall County School District	\$205,571	This Rural Development investment will be used to equip nine hub/end-user sites throughout Marshall County in northern Mississippi with interactive videoconferencing technology. Instructors at Marshall County Central Office; Career and Technical Center; Byhalia Elementary, Middle, and High Schools; H.W. Byers Elementary and High Schools; Potts Camp High School; Galena Elementary; and Mary Reid Elementary School in Marshall County, Mississippi will deliver educational and career development resources in the areas of dual enrollment classes, science, technology, engineering, mathematics, and post-secondary education to nine locations.
MS	Delta Health Alliance, Inc.	\$471,978	This Rural Development investment will be used to equip one hub site and two hub/end-user sites located in Washington and DeSoto County Mississippi with updates to an existing telehealth network, to offer new services and functionality for our rural clinicians, and offer new distance learning opportunities. Professionals located at Leland Medical Clinic, Delta Health Alliance Headquarters and The Endocrine Clinic will provide two fixed locations access to and completion of evidence-based chronic disease, diabetes and chronic pain educational programs that specifically teach participants important self-management skills to engage them in the development of customized health goals and activities to achieve those goals. It is anticipated that this project will benefit approximately 5,000 residents.
MS	Holmes County Consolidated School District	\$933,834	This Rural Development investment will be used to equip nine end-user sites in Holmes County, Mississippi with advanced tele-presence hardware. Instructors with the Holmes County Consolidated School District will provide live streaming and on demand content for distance learning and telemedicine needs as well as functional content software.
MS	Jefferson Davis County School District	\$642,229	This Rural Development investment will be used to equip one hub site and six end-user sites throughout Jefferson county in Mississippi. Instructors at Jefferson Davis County School District in Mississippi will deliver content, instruction, and services from program partners, educational institutions, mental health providers, and resources to seven locations.

Distance Learning and Telemedicine Grants FY 2023 application window

State	Recipient	Grant Amount	Project Description
MT	Interbel Telephone Cooperative, Inc.	\$185,144	This Rural Development investment will be used to equip four hub/end-user sites throughout Lincoln County in northwest Montana with audio/visual hardware, software and inside wiring upgrades. Instructors at the Montana Digital Academy at the University of Montana in Missoula will deliver foreign language, scientific, criminology, AP studies, and college level courses to four locations.
MT, WA	University of Washington	\$1,000,000	This Rural Development investment will be used to equip two hub sites and 12 end-user sites throughout Spokane, King, Asotin, Pacific, Cowlitz, Kitsap, Grays Harbor and Clallam counties in Washington and Blaine, Fergus, Custer and Beaverhead counties in Montana with state-of-the-art teledentistry carts specially designed for oral health care and teaching. Instructors at University of Washington School of Dentistry in Seattle, Washington and UW/Eastern Washington University School of Dentistry site in Spokane, Washington will be able to provide the ability for dental students to successfully learn while training at rural or underserved locations benefitting 89,881 individuals.
NC	Daymark Recovery Services, Inc.	\$635,886	This Rural Development investment will be used to equip five hub sites and 18 end-user sites throughout 21 counties in rural North Carolina with telehealth carts. This project will expand and improve access and quality of care to patients by better equipping their physicians to provide additional and improved telehealth services in the areas of both mental health and substance abuse (including opioid addiction). Daymark found that use of telepsychiatry to treat underserved counties in the region will reduce costs and travel time for their patients. Additionally, it will reduce the impact on local jails and emergency rooms by treating the patient before they end up at those facilities, and reduce the number of patients who get re-admitted to the hospital. With telehealth equipment at 18 rural hub/end-user sites, and 5 hub sites, it is expected that this project will enable access to mental/behavioral health and Substance Use Disorder/Opioid Use Disorder to more than 102,536 rural residents.
NC	Edgecombe County Public Schools	\$998,338	This Rural Development investment will be used to equip 10 hub/end-user sites throughout Edgecombe County in eastern North Carolina with HIPAA-compliant telemedicine stations. Medical professionals and counselors in Edgecomb County, North Carolina will deliver mental health care instruction and provision to 10 locations benefitting 3,875 individuals.
NC	Firsthealth Of The Carolinas, Inc.	\$542,286	This Rural Development investment will be used to equip seven hub sites and seven end-user sites throughout Moore, Richmond, Montgomery, and Lee Counties in North Carolina with tablets and telemedicine kiosks. Medical professionals at First Health of the Carolinas, Inc. in Moore, Richmond and Montgomery Counties in North Carolina will deliver care management and social care management services to seven fixed and multiple variable locations benefitting 231,709 individuals.
NC	Nash Community College	\$348,130	This Rural Development investment will be used to equip one hub sites and one end-user sites within Nash County in North Carolina with high-quality video-conferencing equipment and 3-D interactive educational solutions. Instructors at Nash Community College in Nash County, North Carolina will deliver rural students in real-time, interactive, immersive distance learning experiences supporting them in the attainment of college credit while still enrolled in high school, propelling post-secondary education courses to one location benefitting 400 students.
NC	Washington County Board of Education	\$522,888	This Rural Development investment will be used to equip four hub/end-user sites throughout Washington County in eastern North Carolina with distance learning technology. Instructors within Washington County Schools, and Beaufort County Community College in Beaufort County, North Carolina will deliver various types of instructional courses to four hub/end-user sites benefitting 1,100 students.

Distance Learning and Telemedicine Grants FY 2023 application window

State	Recipient	Grant Amount	Project Description
NC, SC	Scotland Memorial Hospital, Inc.	\$742,432	This Rural Development investment will be used to equip seven hub/end-user sites and two end-user sites throughout Scotland and Robeson Counties in North Carolina and Marlboro County in South Carolina. This project will use telemedicine equipment and software to provide Scotland Memorial Hospital with a robust telehealth and updated communications network to focus on patients receiving quality care for their mental health issues, chronic diseases and general issues that can be treated through telehealth visits. With telehealth services delivered to nine locations, it is expected that this
NE	Educational Service Unit 16 (ESU #16)	\$907,409	This Rural Development investment will be used to equip three hub sites and 29 end-user sites throughout Arthur, Chase, Custer, Duel, Dundy, Frontier, Furnas, Grant, Hayes, Hitchcock, Hooker, Kieth, Lincoln, Logan, McPherson, Perkins, Red Willow, and Thomas counties in west-central Nebraska with video conferencing equipment. Administrators and instructors throughout Nebraska's Educational Services Unit 16 will share staff and resources including mental health services to deliver educational courses and services when an end-user site does not have sufficient resources, staff, or professional development access.
NJ	Rutgers, The State University	\$232,378	This Rural Development investment will be used to equip two hub sites and two end-user sites throughout Burlington, Cumberland, and Middlesex counties in southern New Jersey with state-of-the-art distance learning equipment. Instructors at the Rutgers Food Innovation Center at the New Jersey Agricultural Experiment Station in Cumberland County; Rutgers Agricultural Research and Extension Center in Cumberland County; Phillip E. Marucci Center for Blueberry and Cranberry Research and Extension in Burlington County; and Rutgers Institute for Food, Nutrition, and Health in Middlesex County will deliver courses on topics such as plant diseases, soil health, new crops, health and nutrition, food safety, risk management, regulatory compliance, value added products, beginning farmer, business development, and similar courses that contribute to agricultural and food business viability and sustainability to two locations.
NM	Tanya V Marin, PC dba Santa Teresa Children's Night Clinic	\$474,739	This Rural Development investment will be used to equip six hub sites and five end-user sites throughout Dona Ana, Socorro, and Torrance Counties in New Mexico with AMD telemedicine patient assessment terminals. Health Professionals at Santa Teresa Children's Night Clinic will deliver primary care, mental health services, women's health services, and medically relevant education to five locations benefiting 14,237 individuals.
NM, SC	Palmetto Care Connections	\$941,917	This Rural Development investment in South Carolina and New Mexico will provide for five hub/end-user sites and seven end users sites throughout Allendale, Bamberg, Chester, Horry, Kershaw, Lancaster, Marion and Williamsburg in South Carolina and one hub/end-user site in Sierra County New Mexico. The project will provide advanced tele-health carts, peripherals, and network equipment in 12 locations benefiting 65,613 individuals.
NV	Churchill County, Nevada	\$70,925	This Rural Development investment will be used to equipt four hub sites and four end-user sites throughout Churchill, Pershing, Eureka, and Mineral counties in central Nevada with portable, synchronous, real-time telehealth capable tablets. Community Health Nurses, employed by Central Nevada Health District, will deliver or facilitate routine medical services including follow ups, consults, medication management, low-risk urgent care, and mental health appointments to eight locations.
NV	Nevada Health Centers, Inc.	\$417,468	This Rural Development investment will be used to equip 11 hub sites and nine end-user sites throughout Elko, Storey, Nye, and Lander counties in northern and southern Nevada with improvements and expansion of hardware and software including Telehealth carts. Medical professionals at Nevada Health Centers in Clark County, Nevada will deliver primary care, registered dieticians, certified diabetes educators, pediatricians, internal medicine providers, and behavioral health providers, including substance use treatment, to eight locations.

Distance Learning and Telemedicine Grants FY 2023 application window

State	Recipient	Grant Amount	Project Description
NY	Bertrand Chaffee Hospital	\$278,734	This Rural Development investment will be used to equip one hub/end-user site at Bertrand Chaffee Hospital located in the village of Springville, Erie County, in New York State with telemedicine and distance learning equipment and software platforms. Providers at Bertrand Chaffee Hospital, specifically in the Emergency Department and Medical-Surgical unit will connect with outside providers to deliver specialty consultation and care otherwise not provided at BCH, including mental health care, ultimately benefitting 4,296 patients.
NY	Erie2-Chautauqua-Cattaraugus BOCES	\$775,620	This Rural Development investment will be used to equip 14 end-user sites throughout Chautauqua County, southern Erie County and part of Cattaraugus County in Western New York with video-telecommunications hardware, software and integrated-classroom presentation equipment to create new distance learning rooms and portable solutions. Board of Cooperative Educational Services for the Second Supervisory District of Erie, Chautauqua and Cattaraugus Counties (Erie2-Chautauqua-Cattaraugus BOCES) will improve the quality and quantity of course offerings, including offering Native American instruction in Seneca art, culture, history and language to 11 locations, benefitting a minimum of 7,055 students.
NY	Finger Lakes Community College	\$968,805	This Rural Development investment will be used to equip three hub sites, 13 hub end-user sites, and eight end-users in Ontario, Seneca, Wayne, and Yates Counties in New York with distance learning equipment and technology. The sites will be equipped with dedicated classrooms, mobile classrooms, and/or huddle rooms. Mental Health professionals will deliver mental health preventive education and counseling, and substance abuse prevention education and counseling, while educators will also deliver expanded educational opportunities to include dual credits, share education course, and other educational activities. Instructors at Finger Lakes Community College will deliver career-technical education courses to 21 locations benefitting 7,669 individuals.
NY	Livingston County	\$95,519	This Rural Development investment will be used to equip one hub/end user site in Livingston County in New York with a state-of-the-art, cloud-based Learning Management System. Instructors at Livingston County Center for Nursing and Rehabilitation in Livingston County New York will deliver instructional programming focused on general and geriatric healthcare, mental health and more to individuals at various locations benefitting 65,393 residents.
NY	Otsego Northern Catskills BOCES	\$74,246	This Rural Development investment will be used to equip two hub/end-user sites throughout Delaware County in the Catskill Mountains of New York with Cisco WebEx Room Kit Plus and Cisco WebEx Mini. This project will connect students and staff to nearly 700 distance courses and professional development opportunities to two locations benefitting 1,052 students.
NY	Paul Smith'S College Of Arts And Sciences	\$193,438	This Rural Development investment will be used to equip three hub sites and 20 end-user sites throughout Clinton, Essex, Franklin, and St. Lawrence Counties in northern New York State with teleconferencing equipment. Through distance learning, teachers at high schools participating in Paul Smith's College's Advanced Studies program will receive certification training, professional development, and instructional support to deliver college-level courses at their schools. This project will assist Paul Smith's College faculty and staff to deliver remote guest lectures and virtual field trips and enhance the programs, benefitting 80,332 individuals.
NY	Southern Tier Health Care System, Inc.	\$120,348	This Rural Development investment will be used to equip three hub/end-user sites (two new fixed sites and three non-fixed sites) in Cattaraugus County in southwestern New York. This project will provide training opportunities for healthcare professionals to better address opioid and substance use disorders and mental health care. The project will increase training to approximately 3,000 personnel, benefitting 16,268 individuals.
NY	The Mary Imogene Bassett Hospital dba Bassett Medical Center	\$481,343	This Rural Development investment will be used to equip one hub site and six end-user sites throughout Otsego, Herkimer, Schoharie, and Delaware Counties in rural parts of central New York and the northernmost part of the Appalachian region with on-site carts that will use peripheral devices to allow for a detailed physical. Medical professionals at Bassett Medical Center in Otsego County in New York will deliver Tele-ICU to six locations benefitting 914 individuals.

Distance Learning and Telemedicine Grants FY 2023 application window

State	Recipient	Grant Amount	Project Description
OH	Black River Local School District	\$853,709	This Rural Development investment will be used to equip eight hub sites and two end-user sites throughout Ashland, Lorain, Richland and Summit County in Ohio with ViewBoard bundles, Clinical Assist Telemedicine Carts. Instructors and professors at Akron and Ashland Universities, North Central State College, and Lorain Community College – Wellington will deliver various courses, including science, technology, engineering, math and college credit plus courses to the Black River Local School District via distance learning. Additionally, the second component of this Rural Development investment will be used to equip two Hub sites and two Hub/End-User sites in rural Ashland and Medina Counties in Ohio with telemedicine equipment. Medical professionals at University Hospital and PSI Solutions in Ohio will deliver physical and behavioral health care services including substance use disorder treatment to the Black River Local School District. Project is expected to benefit 1,200 students.
OH	Brookfield Local School District	\$760,874	This Rural Development investment will be used to equip three hub sites and three end-user sites throughout Trumbull and Mahoning counties in northeast Ohio with remote instruction equipment including videoconferencing equipment and interactive displays, as well as med carts to support the mental health needs of the served population. Instructors at Brookfield and West Branch public schools in Trumbull and Mahoning counties in Ohio will deliver increased post-secondary coursework options, career-focused educational instruction, and industry-recognized credentialing courses to six locations benefitting 2,228 students.
OH	Hocking Valley Community Hospital Foundation	\$251,437	This Rural Development investment will be used to equip two hub sites and eight end-user sites throughout Hocking County in southeast Ohio with telehealth equipment for primary care. Medical professionals at Hocking Valley Community Hospital Memorial Fund, Inc. dba Hocking Valley Community Hospital Foundation in Hocking County will deliver primary health care services to the seven distal locations benefitting 3,500 individuals.
OH	Jefferson Area Local School District	\$1,000,000	This Rural Development investment will be used to equip four hub/end-user sites and two end-user sites in Ashtabula County, Ohio with interactive teleconferencing equipment that will allow for one-on-one synchronous tele-education, telebehavioral services and/or telemedicine services. Instructors located at Jefferson Area Board of Education, Jefferson Elementary School and Jefferson Area Local School Bus Garage located in Jefferson, Ohio will deliver synchronous educational content and synchronous two-way tele-educational services and provide access to mental and behavioral health counseling services to six locations benefitting 3,649 residents in rural areas.
OH	Morgan Local School District	\$692,511	This Rural Development investment will be used to equip five Hub/End user sites throughout Morgan County in southeastern Ohio with interactive display panels and Poly classroom-sized webcams. Instructors at Morgan Local School District in Morgan County, Ohio will deliver virtual field trips, a connection with college course providers, multimedia rich activities and mental health assistance to five locations benefitting 2,958 students.
OH	Tolles Career And Technical Center	\$839,408	This Rural Development investment will be used to equip 10 hub sites and 10 end-user sites throughout Madison & Union counties in central Ohio with distance learning equipment and technology. Instructors at Tolles Career & Technical Center in Madison County, Ohio will deliver career-technical education courses to 10 locations benefitting 4,547 students.
OH	University Hospitals Cleveland Medical Center	\$112,200	This Rural Development investment will be used to equip six end-user sites expanding Telehealth access throughout Ashtabula, Cuyahoga, and Geneva counties in Northeastern Ohio. The equipment will help deploy Telemedicine Carts to the Ambulatory Multi-specialty Virtual Clinics, offering subspecialty consultative services including mental health and addiction, psychiatry, malnutrition therapy, rheumatology, endocrinology, and oncology benefitting 3,156 individuals.

Distance Learning and Telemedicine Grants FY 2023 application window

State	Recipient	Grant Amount	Project Description
OH	West Liberty Salem Local School District	\$859,863	This Rural Development investment will be used to equip four hub and one hub/end-user sites throughout Logan, Miami and Champaign counties in Ohio with distance learning equipment. Instructors at West Liberty Salem Local School District, Edison State Community College and Ohio HiPoint Career Center in Champaign, Logan and Miami Counties in Ohio will deliver science, technology, engineering, math, college credit plus, and technical education courses to one location benefitting 1,550 students.
OH, WV	Cabell Huntington Hospital, Inc.	\$967,571	This Rural Development investment will be used to equip one hub site and 11 end-user sites throughout Cabell, Lincoln, and Mason counties in Southwestern West Virginia and Gallia County in Southeastern Ohio with telemedicine equipment. Medical professionals at Cabell Huntington Hospital in Huntington, West Virginia will deliver Critical Care, Neurology, Nephrology, Endocrine and Behavioral / Mental health care services to 11 locations benefitting 26,232 individuals.
OK	Cherokee Nation	\$1,000,000	This Rural Development investment will be used to equip two hub/end-user sites and 16 end-user sites throughout Adair, Cherokee, Delaware, Mayes, Muskogee, Sequoyah and Washington Counties in northeast Oklahoma with telecommunications equipment. Instructors at Greasy Cherokee Immersion School in Adair County, Oklahoma and Durbin Feeling Language Center in Cherokee County, Oklahoma will deliver STEM and language courses to 18 locations benefitting 17,790 students.
OK	Choctaw Nation of Oklahoma	\$558,110	This Rural Development investment will be used to equip one hub sites and 10 end-user sites throughout Atoka, Bryan, Coal, Haskell, Le Flore, McCurtain, Pittsburg, and Pushmataha Counties in southeastern Oklahoma with distance learning web-conferencing equipment and mobile carts. Instructors at Choctaw Nation School of Language in Bryan County, Oklahoma will deliver Choctaw language courses to 20 locations benefitting 6,117 individuals.
OK	Coal County General Hospital, Inc	\$655,982	This Rural Development investment will be used to equip three hub sites and 16 end-user sites throughout Atoka, Choctaw, Coal, Haskell, Hughes, Le Flore, McCurtain, Pittsburg, and Pushmataha Counties in southeastern Oklahoma with telehealth carts including peripherals, fixed wall mounted telehealth devices, and tablets all connected through a telehealth platform for telemedicine. Medical professionals at Coal County General Hospital in Coal County, Oklahoma will connect patients with remote specialty medical providers with synchronous video, audio, and data sharing services to 16
OK	Homecare Advisors, LLC.	\$86,657	This Rural Development investment will be used to equip one hub site location in Bryan County, Oklahoma with tools needed to provide quality mental health services throughout rural Oklahoma. Mental health professionals at Homecare Advisors will deliver virtual mental health services via teletherapy to improve the quality of life for Oklahomans benefitting 350 patients.
OK	Lighthouse Behavioral Wellness Centers, Inc.	\$1,000,000	This Rural Development investment will be used to equip eight hub sites and eight end-user sites throughout Pontotoc, Bryan, Marshall, Love, Garvin, Murray, Johnston, and Seminole Counties in central and southern Oklahoma with mental health access devices. Medical professionals at Lighthouse Behavioral Wellness Centers, Inc. in Pontotoc, Bryan, Marshall, Love, Garvin, Murray, Johnston & Seminole Counties in Oklahoma will deliver mental health telemedicine to eight locations benefitting 1,338 individuals.
OK	McAlester Regional Health Center Authority	\$999,882	This Rural Development investment will be used to equip one hub site and five end-user sites throughout Pittsburg, Pushmataha, Haskell, LeFlore, and Latimer Counties in southeastern Oklahoma with high-performance pan/tilt/zoom cameras and high-definition two-way audio and video telemedicine equipment. Medical professionals at McAlester Regional Health Center in Pittsburg County will deliver nursing, medical consults, telestroke medicine, social work, behavioral health, and support services to five locations benefitting 29,626 individuals.

Distance Learning and Telemedicine Grants FY 2023 application window

State	Recipient	Grant Amount	Project Description
OK	Oklahoma Public School Resource Center, Inc.	\$995,779	This Rural Development investment will be used to equip 10 hub/end user sites and one hub site throughout Oklahoma, Hughes, Garfield, Le Flore, Seminole, Lexington, Glencoe and Granite Counties in Oklahoma with new videoconferencing equipment. Instructors at the Oklahoma Public School Resource Center, in Oklahoma County Oklahoma, will use the interactive video systems and touch panels to connect students and teachers across distances to provide educational programs, instruction or information to 10 locations benefiting 3,209 students.
OK	Paul B. Jacob, D.O., PLLC	\$152,224	This Rural Development investment will be used to equip one hub site and four end-user sites throughout Oklahoma, Coal, and Ottawa Counties in northeast Oklahoma with telemedicine equipment. Medical professionals at Oklahoma Joint Reconstruction Institute in Oklahoma County Oklahoma will deliver orthopedic medical care to four locations benefiting 9,345 individuals.
OK	Southwestern Oklahoma State University	\$899,427	This Rural Development investment will be used to equip 11 hub/end user and end user sites throughout Beckham, Blaine, Caddo, Custer, Dewey and Washita Counties in western Oklahoma with fixed audio and visual classroom equipment. Instructors at Southwestern Oklahoma State University in Custer County Oklahoma will deliver scientific, technical, engineering and mathematics courses to 11 locations benefiting 44,542 students.
OK	Univ of Oklahoma Health Sciences Center	\$861,190	This Rural Development investment will be used to equip 23 end-user sites throughout Adair, Atoka, Beaver, Beckham, Cimmaron, Coal, Ellis, Grady, Harmon, Hughes, Jefferson, Kiowa, Major, Murry, Oklahoma, Pushmataha, Roger Mills, Stephens, Texas and Woods Counties in Oklahoma with audiovisual telemedicine equipment. Medical professionals at OU Health in Oklahoma County, Oklahoma will deliver stroke care to 23 locations benefiting 147,280 individuals.
OK	Western Oklahoma State College	\$919,387	This Rural Development investment will be used to equip one hub sites and nine end-user sites throughout Greer, Harmon, Jackson Counties in western Oklahoma with distance learning equipment. Instructors at Western Oklahoma State College in Jackson County, Oklahoma will deliver professional development opportunities as well as math, science, and mental health services courses to 10 locations benefiting 1,192 students.
OR	Providence Health & Services-Oregon	\$347,374	This Rural Development investment will be used to equip three end-user sites in Yamhill, Hood River and Clatsop Counties in northern Oregon with specialized pieces of telemedicine equipment. Medical professionals with Providence Health and Services of Oregon in Multnomah County, Oregon will help support capacity at smaller rural hospitals with psychological/behavioral health evaluations, stroke evaluations, and neonatal distress evaluations and guidance benefitting 2,025 individuals.
OR	Santiam Memorial Hospital	\$996,935	This Rural Development investment will be used to equip one hub site in Multnomah County, Oregon and one end-user site in rural Marion County, Oregon with a virtual ICU program to increase the critical care available at Santiam Memorial Hospital in Stayton, Oregon. 35 fellowship-trained, board-certified intensivists and nearly 30 highly-skilled registered nurses certified in critical care from OHSU Hospital will provide support and consultation to the Santiam Hospital ICU clinicians and nursing staff whenever needed through on-demand, two way video communication and patient monitoring benefitting 150 individuals.
OR	Southern Coos Hospital & Health Center	\$165,252	This Rural Development investment will be used to equip four hub/end-user sites throughout Coos County in Southwest Oregon with InTouch Lite 4 hardware and networking access. Medical professionals at Southern Coos Hospital & Health Center in Coos County will deliver healthcare services via telemedicine to four locations benefiting 3,066 patients.

Distance Learning and Telemedicine Grants FY 2023 application window

State	Recipient	Grant Amount	Project Description
OR, WA	Klickitat County Public Hospital District No 2	\$86,782	This Rural Development investment will be used to equip one hub site and two end-user sites throughout Klickitat and Multnomah counties in Washington with telemedicine equipment. Medical professionals at Oregon Health Sciences University in Portland, Oregon will deliver specialized telehealth robots that will allow a remote neurologist to speak with patients and the local care team while reviewing CT and other images taken in real-time at the rural facility benefitting 2,224 individuals.
OR, WA	One Community Health	\$439,629	This Rural Development investment will be used to equip two hub/end-user sites and two end-user sites in Hood River and Wasco County, Oregon and Klickitat County in Washington with audio-visual and telehealth-specific equipment. Medical professionals at One Community Health in these counties of Oregon and Washington will be able to deliver diverse medical, behavioral health and dental telehealth-based treatment at four locations within these Counties to benefit 23,011 individuals.
PA	Cen-Clear Child Services, Inc.	\$150,863	This Rural Development investment will be used to equip one hub site and seven end-user sites throughout Centre, Huntingdon, Clearfield, Blair, Elk, and Mifflin Counties in central Pennsylvania with interactive telehealth equipment. Medical professionals at Cen-Clear Child Services, Inc. in Blair County Pennsylvania, will deliver mental healthcare/psychiatric services and substance/opioid use disorder treatments with medication-assisted treatments to seven locations benefitting 7,435 individuals.
PA	Conemaugh Township Area School District	\$939,512	This Rural Development investment will be used to connect 11 hub sites and one end-user site throughout Somerset, Cambria, Blair and Allegheny Counties in Western Pennsylvania with telehealth and distance learning equipment. Instructors at Penn Highlands Community College, University of Pittsburgh Johnstown, Greater Johnstown Career and Technology Center and other area colleges and museums will deliver distance learning in the form of dual enrollment courses, foreign language instruction, virtual field trips, and educational experiences, benefitting 483 students.
PA	Forest Hills School District	\$549,589	This Rural Development investment will be used to equip 11 hub sites and two end-user sites throughout Cambria, Dauphin, and Blair Counties in central Pennsylvania with telecommunications equipment. Instructors at Forest Hills School District will deliver instructional content to 13 locations benefitting 1,707 students.
PA	Geisinger Clinic	\$948,741	This Rural Development investment will be used to equip one hub site and two end-user sites throughout Montour and Northumberland Counties in central Pennsylvania with innovative virtual care telemedicine devices. Medical professionals at Geisinger Justin Drive in Montour County, Pennsylvania will deliver virtual nursing care to 2 locations benefitting 21,551 individuals.
