Project Title and Project Description

NON-CONFIDENTIAL: Project Title: North Shore Project

NON-CONFIDENTIAL: Project Description: PRIDE Network, Inc. proposes to construct a FTTP telecommunications infrastructure, with a Wireless service-extension overlay, that will bring advanced broadband services to rural communities in the St. Helena, Washington, and Tangipahoa Parishes, Louisiana. The network will initially offer data speeds of 20 to 100 Mbps

5523	PRIDE South

If YES, please explain any synergies and/or dependencies between this project and any other applications.

Other Project Information

Executive Summary of the proposed project

PRIDE Network, Inc. (“PRIDE Net”), a wholly owned subsidiary of NTS Communications, Inc. (“NTS”), was granted funding for two applications during Round One of the American Recovery and Reinvestment Act of 2009 (ARRA) stimulus session. PRIDE Net is determined to provide reasonably priced, quality broadband service to areas of persistent poverty and to communities that have experienced the worst in the current economic recession. As evidenced by its prior granted awards and NTS’s extensive experience with Fiber-To-The-Premise (“FTTP”) and other communications networks, it is apparent that PRIDE Net is well suited to implement, manage, and succeed with projects of this magnitude and to comply with all rules and procedures required by the ARRA.

The PRIDE Net North Shore Project plans and service objectives advance the goals of the FCC’s National Broadband Plan as published on March 15, 2010 by making available download speeds exceeding 5 megabits per second to the majority of the population in the project service area in

**Broadband Infrastructure Application
Submission to RUS – Broadband Infrastructure Program**

Submitted Date: 3/28/2010 9:09:57 PM	Easygrants ID: 5109
Funding Opportunity: Broadband Initiatives Program	Applicant Organization: PRIDE NETWORK, INC.
Task: Submit Application - BIP	Applicant Name: Mr. Tony Lee Esq.

advance of the time line proposed in the National Broadband Plan. As the PRIDE Net, North Shore Project evolves with technological improvements and reinvestment of income generated by the network, improvements in the speed capability will be expanded to a greater portion of the service area in realization of the goals of the National Broadband Plan.

The communities that will be served by the North Shore Project will include Amite, Franklinton, Independence, Montpelier, Tickfaw, Natalbany, Hammond, and Ponchatoula, Louisiana. None of the areas listed have full access to Advanced Broadband Services today. Portions of the proposed project areas to have access to high speed internet access; however, such service is not affordable to most of the people that reside in those communities, including those that have lost their jobs during the current financial crisis and need the advantages that Advanced Broadband services can provide with respect to job training, placement, and new entrepreneurial ventures. Where broadband service is available, service is sporadic in terms of coverage, reliability, and speed. PRIDE Net will offer a competitive choice that will be far more affordable, reliable, and ubiquitous for the targeted populations in these difficult economic times.

According to Children’s Defense (<http://cdf.childrensdefense.org/site/DocServer/la-3.pdf?docID=653>), Louisiana ranks 49th among states in the percent of children who are poor, with 73% of eligible persons receiving food stamps. This is an unsettling statistic, and it has been proven time and time again that the key to diminishing these high poverty numbers is with the availability of resources that people in urban areas have access to everyday. With Advanced Broadband Services, people in the state of Louisiana would have more access to the tools they need to be successful, take care of their families, and to thrive.

Louisiana has a poverty level of 19.4% and is ranked 48th in the nation in this category. See: (http://www.statemaster.com/graph/eco_per_bel_pov_lev-economy-percent-below-poverty-level). Moreover, Louisiana has 80% of fourth graders reading below grade level, and 79% fourth graders below grade level in math. In St. Helena, Tangipahoa, and Washington Parishes, the site of the proposed construction, 26.6% of the population under age 18 is below poverty. Over the last 20 years, Louisiana’s poverty rate has fluctuated considerably, but today it is only 3 points lower than it was in 1980. While the South narrowed the gap with the rest of the country during that time period, Louisiana’s poverty rate remains more than 50% above the national average.

**Broadband Infrastructure Application
Submission to RUS – Broadband Infrastructure Program**

Submitted Date: 3/28/2010 9:09:57 PM	Easygrants ID: 5109
Funding Opportunity: Broadband Initiatives Program	Applicant Organization: PRIDE NETWORK, INC.
Task: Submit Application - BIP	Applicant Name: Mr. Tony Lee Esq.

The North Shore Project will make affordable Advanced Broadband Services available to the following Louisiana communities: Amite, Franklinton, Independence, Montpelier, Tickfaw, Natalbany, Hammond, and Ponchatoula. The proposed construction sites will be in portions of St. Helena, Tangipahoa, and Washington Parishes. The North Shore Project will be extended to additional communities not listed above that also lack access to affordable Advanced Broadband service as profits are reinvested in new infrastructure construction. In this way, by first using federal grant/loan dollars to build the core of the network and its initial passings, and then by allowing future profits to further expand network growth, PRIDE Net will create a continuous benefit cycle to the entire region for generations to come.

When complete, the North Shore Project will initially serve the following populations:

Households passed: (b) (4) Businesses passed: (b) (4)

(b) (4)

NTS, through its wholly-owned subsidiary PRIDE Net, is fully capable of constructing and operating the North Shore Project in a competent manner in compliance with all applicable Federal, state, and local laws. NTS and its sister company in Louisiana, Xfone USA, Inc., have an operating history of more than 30 years in the communications industry. Their operations have consistently proved their respective capability to provide high quality and low cost communications services to the communities they serve.

NTS Communications, Inc. was formed in 1981 and achieved competitive local exchange carrier ("CLEC") status in 1999. NTS operates as a wholly owned subsidiary of Xfone, Inc. (NYSE Alternext: "XFN"). NTS is headquartered in Lubbock, Texas and with its staff of 300-plus employees, provides a full range of wireline voice and data services to customers in Arizona, Colorado, Kansas, New Mexico, Oklahoma, and Texas. Acting in a management capacity, NTS also directs the business and service delivery of its sister company, Xfone USA, Inc., which provides a full range of similar voice and data services to customers in Louisiana and Mississippi.

Since 2004, NTS has engaged in an aggressive build-out of FTTP networks in Lubbock, Wolfforth, and Woodrow, Texas. To date, NTS has constructed approximately 650 route miles of fiber optic distribution plant encompassing in excess of 18,000 gross passings in these communities. Using its FTTP facilities, NTS provides full featured voice, IPTV video, and data services to its customers. Of note, one of NTS's subsidiaries, NTS Telephone Company, LLC, is the recipient of an \$11 million USDA Broadband Loan to bring FTTP voice, video, and data services to the communities of Levelland and Smyer, Texas. The project is currently in its last phases of construction. Implementation of this project has increased the management experience of NTS with regard to construction methodologies, unique accounting treatment, and overall project management required by RUS funded projects. Further, PRIDE Net is a recipient of two combination grant/loan awards from the USDA Broadband Initiatives Program for a total of approximately \$65 million.

PRIDE Net's parent company, NTS, as described above, operates a large existing network that will provide a reliable support framework, back-office, and network interface infrastructure for the North Shore Project. PRIDE Net, via a service agreement with NTS, will have the resources it requires to allow it to immediately provide carrier class service and reliability for the North Shore Project service area. A service agreement with PRIDE Net's sister company Xfone USA will also be in place to cover co-location and local sales and field support. These existing

**Broadband Infrastructure Application

Funding Opportunity: Broadband Initiatives Program	Applicant Organization: PRIDE NETWORK, INC.
Task: Submit Application - BIP	Applicant Name: Mr. Tony Lee Esq.

capabilities and resources will be instrumental in PRIDE Net’s ability to maintain the project schedule and provide the ongoing sales, back-office, and field support for North Shore Project network operations.

There are no co-applicants with this application. However, it should be noted that PRIDE Net has collaborated with the City of Hammond, Louisiana in constructing the network plan. The City of Hammond was awarded grant funding for the improvement of water/sewer and public safety as part of ARRA.

Full details regarding the cost of the entire project is set forth in the Attachment 22 – Project Capital Investment. The overall infrastructure cost of the proposed system is \$36,198,857. Overall passings for the project are estimated to be 13,075 and expected subscriber take-rate projections, using our most conservative model, estimate providing Advanced Broadband Services to 5963 customers within the pro-forma period.

PRIDE Net estimates the creation of 720 jobs to construct and operate the PRIDE Net North Shore project. This estimate is based on studies finding that 20 jobs are created for each \$1 million in investment in the construction of a fiber to the premises network (Jeffrey Eisenach, Hal Singer, and Jeffrey West, Empiris, LLC, Economic Effects of Tax Incentives for Broadband Infrastructure Deployment, pp. 8-9 (January, 2009)).

In addition, by accelerating affordable Advanced Broadband deployment to communities without access to such state of the art technology today, the North Shore network will attract new businesses to these communities, which will generate economic activity and create approximately an additional 596 jobs. These projections are based on studies showing the indirect creation of one job for every 10 subscribers to an Advanced Broadband network. (Jeffrey Eisenach, Hal Singer, and Jeffrey West, Empiris, LLC, Economic Effects of Tax Incentives for Broadband Infrastructure Deployment, pp. 17-18 (January, 2009); see also, Robert Crandall, William Lehr, and Robert Litan; The Effects of Broadband Deployment on Output & Employment: A Cross Sectional Analysis of U.S. Data, 6 Issues in Economic Policy 12-14 (July 2007).

The PRIDE Net North Shore project promotes rural economic development by:

Is the applicant cooperating with any other Recovery Act Awards?

- Yes

If the answer to the above question is "Yes," description of Cooperation with other Recovery Act Awards:
PRIDE Network, Inc. (PRIDE Net) will be cooperating, upon approval, with the City of Hammond, Louisiana. Hammond was the recipient of a \$250,000.00 Recovery Act Award to improve the city's Department of Health and Human Services, a \$190,280.00 award for the Department of Justice, a \$46,239.00 award for the Department of Justice, and an additional \$800,000.00 out of the \$43 million awarded to the Louisiana Department of Environmental Quality. These collaborations will increase the quality of life and experience of the PRIDE Network, Inc./City of Hammond management capabilities. See Recovery Act upload for coordinating documentation.

Is the applicant seeking a waiver of the Buy American provision?

- No

If YES, click "Add" to provide your justification for the waiver:

B. Co-Applicant or Consortium

Are you applying with any other key institutions, organizations, or other entities for this project?

- No

If YES, Co-Applicants are listed below:

H. Self Scoring

Criteria	Method	Points	Self Score
Proportion of Rural Residents Served in Unserved Areas	Points will be awarded for serving rural residents located in unserved areas. For every 10 percent of unserved households compared to the total households to be served that will receive broadband service, 1 point will be awarded up to a maximum of 10 points. For Middle Mile projects, this will be based on the location of the interconnection points.	0 - 10	0

**Broadband Infrastructure Application
Submission to RUS – Broadband Infrastructure Program**

Submitted Date: 3/28/2010 9:09:57 PM		Easygrants ID: 5109	
Funding Opportunity: Broadband Initiatives Program		Applicant Organization: PRIDE NETWORK, INC.	
Task: Submit Application - BIP		Applicant Name: Mr. Tony Lee Esq.	

Criteria	Method	Points	Self Score
Rural Area Targeting	Points will be awarded for exceeding the 75 percent rural area service requirement. For every five percent increase in the total proposed funded service area that is above the 75% rural requirement, 2 points will be awarded up to a maximum of ten points. For MM projects, this will be based on the location of the interconnection points.	0 - 10	0/4
Distance from Non-Rural Areas	One point will be awarded for each additional 10 miles that at least one proposed funded service area is located away from the closest non-rural area, up to a total of five points. For applicants with multiple service areas, this calculation will be based on the service area closest to the non-rural area. For MM projects, this will be based on the location of the interconnection points.	0 - 5	0
Title II Borrowers	Eight points will be awarded to applications which are submitted by entities which have borrowed under Title II of the RE Act.	0 or 8	0
Other Recovery Act Awards	Five points will be awarded for any cooperation with a Recovery Act award.	0 or 5	0
Performance of the offered service	<u>For Last Mile Projects:</u> For wireline projects that are constructed to deliver a minimum of 5 Mbps service to the premises (upstream and downstream combined), 5 points will be awarded. For wireline projects that are constructed to deliver a minimum of 20 Mbps service to the premises (upstream and downstream combined), 10 points will be awarded. For wireless projects that are constructed to deliver a minimum of 3 Mbps service to the end user (upstream and downstream combined), 8 points will be awarded. For mobile wireless projects that are constructed to deliver a minimum of 3 Mbps service to the end user (upstream and downstream combined), 10 points will be awarded. Scoring will be based on the predominant technology used for combination systems. <u>For Middle Mile Projects:</u> For middle mile projects that are constructed to deliver 100 Mbps service to all interconnection points in their network, 10 points will be awarded.	0, 5, 8, or 10	0/4
Services to Critical Community Facilities and Small Disadvantaged Businesses	Points will be awarded to applications that are proposing to offer discounted rate packages to all critical community facilities in the proposed funded service area(s) that are at least 25 percent lower than the proposed base rate packages for at least three years, 4 points will be awarded. for Critical Community Facilities. For applications that are proposing to offer discounted rate packages to disadvantaged small businesses under section 8(a) of the SBA, 2 points will be	0,2, 4, or 6	0
