

Water and Environmental Program September 23, 2019

State	Sens.	Reps.	Recipient	Loans	Grants	Project Description
AL	Doug Jones, Richard Shelby	Robert Aderholt (04)	City of Sheffield	\$1,335,000		This Rural Development investment will be used to construct water and sewer lines for a new development called Inspiration Landing. It will bring a hotel, amphitheater, event center and retail center to Sheffield, Ala. The proposed site currently does not have access to water or sewer services. These updates will also provide service to 4,348 residential customers and 200 commercial customers.
AL	Doug Jones, Richard Shelby	Martha Roby (02)	City of Headland	\$592,000		This Rural Development investment will be used to replace all water meters in the system with radio-read meters. The existing meters are old, resulting in inaccurate readings and some unaccounted-for water usage. Meter reading ties up all three maintenance personnel for four days each month. Radio read meters are more accurate and efficient. This allows the maintenance personnel to focus on other required tasks.
AR	John Boozman, Tom Cotton	Bruce Westerman (04)	City of Hamburg	\$630,000	\$1,201,000	This Rural Development investment will be used to construct a water extension and make improvements to the city's existing water system. The project's purpose is to add new water users to the system and rehabilitate the existing water collection system and water treatment plant. This project will provide more reliable public water supply to area rural residents.
AR	John Boozman, Tom Cotton	Bruce Westerman (04)	City of Kingsland	\$393,000	\$233,150	This Rural Development investment will be used to make improvements to the city's existing water system. These improvements will include rehabilitation of the existing water storage tank, repairs to the chlorine leak detection system, replacing existing water meters and installing standby power and emergency connection to a neighboring water association. The proposed project will provide the rural users with safe and reliable drinking water.
AR	John Boozman, Tom Cotton	Rick Crawford (01)	Town of Mount Pleasant	\$178,000		This Rural Development investment will be used to rehabilitate an existing 180,000-gallon water storage tank. The project will include removing and repainting the tank's interior and exterior coating, the installation of a mixing system and additional safety features. This project will provide the rural users with safe and reliable drinking water.
AR	John Boozman, Tom Cotton	Rick Crawford (01)	City of Star City	\$1,900,000	\$493,000	This Rural Development investment will be used to rehabilitate the city's existing wastewater treatment plant and lift stations system. Many components of the wastewater treatment facility, including the decanter assembly, influent screens, grit removal system, and post aeration chamber, do not function properly and need to be repaired. Additionally, a new ultraviolet disinfection system will be installed to replace the current chlorine disinfection system. This project will help the city comply with health and sanitary standards.

Water and Environmental Program September 23, 2019

State	Sens.	Reps.	Recipient	Loans	Grants	Project Description
CA	Kamala Harris, Dianne Feinstein	Doug LaMalfa (01)	Donner Summit Public Utility District	\$336,000		This Rural Development investment will be used to bring the Donner Summit Public Utility District's Big Bend water system into compliance with current state regulations. The project will include constructing a new disinfection treatment plant with new controls, instruments, communications and the replacement of approximately 1,400 feet of deteriorated water transmission lines. The project will ensure safe, clean, drinking water is provided to all residents of the Big Bend service area.
CA	Kamala Harris, Dianne Feinstein	Jerry McNerney (09)	Woodbridge Sanitary District	\$1,500,000		This Rural Development investment will be used to modernize Woodbridge Sanitary District's wastewater system. This project will upgrade electrical controls to the lift stations, pumping facilities and pond aerators. It will replace tank components, recoat tank interiors, re-line the ponds and deepen an overflow pond. This project will significantly improve the system's reliability and enhance the district's ability to operate their wastewater treatment plant and lift stations that pump wastewater to the plant.
CA	Kamala Harris, Dianne Feinstein	Salud Carbajal (24)	County of San Luis Obispo	\$3,205,221		This Rural Development investment will be used to improve the water system in the town of Cayucos, Calif. Currently, the town falls short of nearly half the recommended and required standards for water storage, putting the citizens health and safety at risk. This project will remove the community's existing water tank that is no longer useful, and replace it with two 210,000 gallon storage tanks.
CO	Michael Bennet, Cory Gardner	Joe Neguse (02)	Town of Estes Park	\$1,315,000		This Rural Development investment will be used to replace 2,630 linear feet of water lines in a critical area of town along Big Thompson Avenue, which have exceeded their useful life. The current pipe size will also be increased to provide adequate fire flow to approximately 5,000 users.
CO	Michael Bennet, Cory Gardner	Ken Buck (04)	Town of Peetz	\$376,000	\$924,000	This Rural Development investment will be used to construct a new wastewater evaporative pond for treatment of the town's sewage, purchase land necessary for the new plan, and cover the engineering, legal and other costs associated with the project. Their current facility does not comply with state guidelines and policy, but will be resolved with this project.
CO	Michael Bennet, Cory Gardner	Ken Buck (04)	Town of Wiggins	\$5,568,000	\$4,360,000	This Rural Development investment will be used to fund the first of three phases for the town's wastewater project. This first phase will consist of augmentation ponds that will be used for both augmentation, as well as a discharge point for effluent of a new wastewater treatment plant planned in phase 3. This phase will allow for replacement of several hundred feet of damaged sewer lines, and also refinance existing debt for the sewer augmentation pond and future wastewater treatment property. This project will ultimately provide a safe and sanitary system that is currently violating health and sanitary standards.

Water and Environmental Program September 23, 2019

State	Sens.	Reps.	Recipient	Loans	Grants	Project Description
FL	Marco Rubio, Rick Scott	Mario Diaz-Balart (25)	Immokalee Water and Sewer District	\$944,000	\$765,000	This Rural Development investment will be used to help the Immokalee Water and Sewer District make improvements to the existing wastewater treatment plant. Improvements consist of replacing the three oldest clarifiers that are around 25 years old. Due to the age and placement of the older clarifiers, workers are placed at risk when maintaining and cleaning them. These improvements will increase wastewater treatment efficiency and reliability along with addressing the safety concerns of the operators.
FL	Marco Rubio, Rick Scott	Neal Dunn (02)	Town of Greenwood	\$92,000	\$276,400	This Rural Development investment will be used to provide additional financing for a water system improvement project. The town's wells were found to have fecal contamination and this has affected the quality of the water. The project will construct a 650 gallons-per-minute well to eliminate potential health problems. Approximately 5,600 linear feet of existing water mains will be replaced. The project will provide for clean and reliable water for the citizens of the town.
GA	Johnny Isakson, David Perdue	Jody Hice (10)	City of Sandersville	\$2,488,500		This Rural Development investment will be used to provide additional financing for improvements to the city of Sandersville's water system and the city's wastewater system. The proposed improvements will include a new water treatment plant on the existing site, a new 500,000 gallon clearwell, and the addition of approximately 43,000 linear feet of piping to the distribution system to provide service to current and unserved customers. The proposed improvements for the wastewater system will include a new mechanical bar screen and grit chamber, conversion of existing wastewater pond to an equalization basin, the replacement and addition of approximately 58,000 linear feet of sewer lines, including the replacement of their respective pump stations. This will then provide service to current customers as well as unserved customers. USDA Rural Development provided original funding in the amount of \$12,792,000 (obligated September 8, 2016) for this project.
IA	Joni Ernst Charles Grassley	Abby Finkenauer (01)	City of Brandon	\$100,000		This Rural Development investment will be used to provide additional financing for improvements of the wastewater treatment system to bring it into compliance with current design standards. Updates to the lagoon treatment facility will help the system to comply with water quality rule changes and the implementation of ammonia-nitrogen, total nitrogen and disinfection requirements.
ID	Mike Crapo, James Risch	Mike Simpson (02)	City of Heyburn	\$5,507,000	\$2,043,000	This Rural Development Investment will be used to improve the city of Heyburn's wastewater treatment plant with updated equipment and a new administrative building as well as make improvements to the collection system. The new treatment plant will enable the city to handle the solid waste in a more efficient manner. The 1,388 users will benefit by having a system that is fully functional and able to receive and treat all wastewater.

Water and Environmental Program September 23, 2019

State	Sens.	Reps.	Recipient	Loans	Grants	Project Description
IL	Tammy Duckworth, Richard Durbin	John Shimkus (15)	Fayette Water Company	\$500,000	\$190,000	This Rural Development investment will be used to install an emergency interconnect to a neighboring community. This will allow Fayette Water Company to sell bulk water in the near future. This project will also install approximately 19 miles of new water mains which will serve additional customers. This project will alleviate health and sanitary concerns, provide safe, potable, water, improve water pressure and serve new customers in Fayette County.
IL	Tammy Duckworth, Richard Durbin	John Shimkus (15)	City of Brookport	\$1,000,000	\$1,770,000	This Rural Development investment will be used to replace hydrants, valves and existing cast-iron and under-sized water lines for the city of Brookport. Funds will also go towards painting the existing water tower and modifications to a water interconnect. This project will improve water quality, water pressure and eliminate health and sanitary concerns.
IL	Tammy Duckworth, Richard Durbin	John Shimkus (15)	City of Sullivan	\$8,500,000		This Rural Development investment will be used to construct a new water treatment plant and a new building to house their only clarification unit at the plant. The new plant will be designed to treat 1.5 million gallons of water per day. The proposed treatment will be clarification via claricone filtration, via gravity filters and a chemical feed system with chlorine and fluoride. The plant will be built on the site of the current water plant allowing the current water plant to stay in operation which will result in a seamless transition to the new plant. This project will replace their existing water treatment plant, portions of which are over 40 years old and are in need of major repair. It will alleviate an existing health and sanitary hazard that exists due to the age and condition of the plant and will correct a non-compliance advisory issued by the Illinois Environmental Protection Agency.
IN	Mike Braun Todd Young	Greg Pence (06)	Town of Gaston	\$488,000	\$1,029,000	This Rural Development investment will be used to provide funding for upgrades to Gaston's water system. This includes hydrants, auto-readers and software, and the installation of 13 new isolation valves and a six-inch water main connecting the water main at Wes-Del Elementary School to the water main on Jackson Street. There is an existing four-inch water main present in the system that will be upgraded to a six-inch water main in several areas. Gaston's 871 residents in rural Delaware County will benefit from this project as it is needed to alleviate violations of health and safety standards for control and delivery of water at suitable flow and pressure.

Water and Environmental Program September 23, 2019

State	Sens.	Reps.	Recipient	Loans	Grants	Project Description
IN	Mike Braun Todd Young	Jackie Walorski (02)	Town of North Judson	\$323,000		This Rural Development investment will be used to provide additional assistance to a project dealing with a combined sewer collection system being converted into separate sanitary and storm sewers. This work involves the construction of new storm sewers along with sewer rehabilitation of the sanitary sewers. A new 1,000 gallon per minute (GPM) pump will be installed at the existing flow equalization pump station, bringing the firm pumping capacity of that station up to 2,000 GPM. A new 490 GPM pump station and force main to the existing oxidation ditch is proposed. The pump station will consist of a triplex, suction lift package lift station located between the two existing final clarifiers. A dedicated pump station will free-up raw sewage pumping capacity at the existing raw sewage (influent) lift station. New direct-drive motors with variable frequency drives will be installed at the existing oxidation ditch. The new oxidation ditch drive assemblies will provide greater operational efficiency, reduce operational and maintenance (O&M) costs, and extend the useful life of the existing aeration equipment. The existing chlorine disinfection basin will be expanded to provide the necessary volume to ensure proper disinfection at peak wastewater flows. Lastly, a new properly sized effluent flow meter is also included with the proposed project. This will benefit North Judson's 1,772 residents in rural Starke County, Ind. A previous Rural Development direct loan of \$3,892,000 and a Rural Development planning grant of \$28,100 were obligated for this project. An applicant contribution of \$66,400 is included.
KY	Rand Paul Mitch McConnell	Harold Rogers (05)	Big Sandy Water District	\$395,000	\$145,000	This Rural Development investment will be used to complete the rehabilitation of eight existing storage tanks, construction of a new pump station, rehabilitation of five existing pump stations and the replacement of approximately eight miles of distribution lines. This will alleviate potential health and sanitary issues and reduce water loss in the system. The project also includes the construction of a new 3,000 square foot office building to replace a 20-year old double-wide trailer that has become inadequate for the district's needs. These improvements will benefit approximately 4,756 existing customers in rural Boyd County.
KY	Rand Paul Mitch McConnell	Brett Guthrie (02)	Larue County Water District No. 1	\$2,800,000	\$1,000,000	This Rural Development investment will be used to construct a new elevated water storage tank, a booster pump station, and a new office/maintenance building. It will also refurbish two existing tanks and make numerous connections and loop lines to improve flows, pressures and water quality throughout the system. The office building is necessary to provide better and safer customer access to the drive-thru window, which currently backs onto the roadway during peak periods. These improvements will benefit 3,380 existing and 10 new customers in rural Larue County.

Water and Environmental Program September 23, 2019

State	Sens.	Reps.	Recipient	Loans	Grants	Project Description
KY	Rand Paul Mitch McConnell	Thomas Massie (04)	City of Falmouth	\$1,660,000	\$554,000	This Rural Development investment will be used to construct a wet-weather basin to retain flows that exceed the wastewater treatment plant's capacity during heavy rainfall events to be treated at a later date. This is a corrective measure in response to an Agreed Order from the Kentucky Division of Water (DOW) which was placed on the city for failure to meet discharge limits. In addition, the city will remove the existing coating system and repaint the interior and exterior of a 250,000 gallon water storage tank. This is in response to an inspection that revealed a majority of the coating was failing and in poor condition, with exterior coating containing high levels of lead. This is also a corrective measure in response to a Notice of Violation from the DOW for failure to inspect or clean the tank in a timely manner. These actions will ensure a safe, sanitary, means of waste disposal for 955 sewer customers and a safe, dependable, water supply for 959 customers in rural Pendleton County.
KY	Rand Paul Mitch McConnell	James Comer (01)	Simpson County Water District	\$1,529,500		This Rural Development investment will be used to construct approximately four miles of four-inch, eight-inch, and 12-inch waterline, replace approximately six miles of existing deteriorating waterline, and construct a new pump station and master meters. These improvements will alleviate the loss of water and revenue, and meet the demands of current and future customers. In addition, the system will be able to accommodate the demands of the new Fritz Winter North America foundry and production facility, which is anticipated to use approximately 10 percent of the system's daily water production. This project will ensure a safe, dependable, water supply for 3,399 existing and four new customers in rural Simpson County and encourage more industry to locate in the area, boosting the local economy and bringing employment opportunities.
ME	Susan Collins, Angus King	Chellie Pingree (01)	Town of Camden	\$12,500,000	\$1,400,000	This Rural Development investment will be used to upgrade Camden's wastewater treatment facility and rehabilitate three pump stations. The sewer department provides safe and reliable sanitary wastewater services for the inhabitants of Camden and a small portion of Rockport, Maine. The system's original equipment and the overall facility are beyond the useful life for which they were originally designed. The rehabilitation improvements address the aging infrastructure and capacity issues in the project area, as well as restore the design capacity of the facility at a reasonable cost. The proposed upgrades will help the system operate more effectively and efficiently and addresses the Maine Department of Environmental Protection's health and sanitary concerns. These upgrades represent the highest priorities identified in the town's master plan and will have the greatest benefit to the wastewater system, which serves 2,235 users.

Water and Environmental Program September 23, 2019

State	Sens.	Reps.	Recipient	Loans	Grants	Project Description
ME	Susan Collins, Angus King	Jared Golden (02)	Paris Utility District	\$221,000		This Rural Development investment will be used to replace an eight-inch, 100 year-old cast-iron water main in South Paris in conjunction with a Maine Department of Transportation project. The water main was beyond its useful life and needed to be replaced to provide reliable water service along the Billings Bridge.
ME	Susan Collins, Angus King	Jared Golden (02)	Paris Utility District	\$189,000		This Rural Development investment will be used to make needed repairs to the sewer lines along the Billings Bridge that is located in South Paris. The replacement of the 46 year-old 12-inch gravity asbestos cement sewer pipe will provide for more reliable wastewater service to the 1,216 users on the system.
MI	Gary Peters, Debbie Stabenow	Jack Bergman (01)	Village of Mackinaw City	\$4,840,000		This Rural Development investment will be used by the Village of Mackinaw City for improvements to their water system. The water system includes a well field, storage tank and distribution system. The proposed project includes replacing the water main, loop dead-end main, a new 150,000 gallon elevated water storage tank to increase storage capacity and a new standby generator for well #1 for increased system reliability. The Michigan Department of Environmental Quality issued a letter dated September 12, 2017 citing water deficiency in the current water storage capacity under Act 399, Rule 1105. The water system does not have sufficient capacity to provide for the fire flow needs of the service area while continuously maintaining acceptable pressure levels throughout the system. The water system serves 416 residential and 238 commercial customers.
MO	Roy Blunt Josh Hawley	Sam Graves (06), Vicky Hartzler (04)	Thomas Hill Public Water Supply District No. 1 of Randolph County	\$1,772,000		This Rural Development investment will be used to replace water distribution lines in the villages of Clifton Hill and Renick, both in rural areas of Randolph County, Mo. The water distribution lines in the villages were installed in the mid-1970's and are starting to fail. This project will help to continue to deliver high quality, potable, water to the 286 residents in those villages.
ND	Kevin Cramer John Hoeven	Kelly Armstrong (At Large)	City of Reeder	\$182,000	\$118,000	This Rural Development investment will be used to finance sewer system improvements for the residents of the city of Reeder in Adams County, N. D. Reeder has a population of 162 and is located in the Southwest Rural Economic Area Partnership Zone. Several areas of town have sewer pipes that have significant blockage from roots or debris, offset joints, cracks and holes. With the completion of this project, which will replace the most deteriorated and damaged sewer pipe segments, the city will be able to continue to provide sanitary sewer services and avoid major system failures in the future.

Water and Environmental Program September 23, 2019

State	Sens.	Reps.	Recipient	Loans	Grants	Project Description
NE	Deb Fischer Ben Sasse	Jeff Fortenberry (01)	Sanitary and Improvement District No. #1 of Clay County, Nebraska	\$65,400		This Rural Development investment will be used to provide additional financing for water infrastructure. In fiscal year 2018, SID No. #1 the district began reconstructing its water system. The district was unable to account for approximately 90 percent of its water purchases due to a combination of unknown connections and leaks. This project will ensure that this is remedied and all costs are accounted for.
NE	Deb Fischer Ben Sasse	Adrian Smith (03)	Rural Water District No. 2 Richardson County	\$327,000	\$1,000,000	This Rural Development investment will be used to expand the existing water infrastructure. 72 new users will be hooked up to Rural Water District No. #2 Richardson County's existing system serving southeast Richardson County. Currently these users experience water quantity shortage and high nitrates. The Rural Water District purchases water from Falls City. The distribution system pipeline will be expanded using two-inch and three-inch PVC piping, branching off the new six-inch line that will be constructed from Falls City to Indian Cave State Park. This project will construct new facilities required to meet applicable health standards.
NH	Maggie Hassan Jeanne Shaheen	Chris Pappas (01)	Town of Newmarket	\$6,819,000	\$1,434,000	This Rural Development investment will be used to address water system deficiencies. The project includes replacing aging pipes, upgrading two wells, adding a fourth well to increase supply, installing a treatment and blending facility to improve water quality and supply reliability and extending the water lines to residential properties in need of a reliable water source. The project also includes upgrades and treatment to the town's largest well which will be funded through the N.H. Drinking Water and Ground Water Trust Fund. These improvements will bring the system into state compliance and provide enhanced water quality and reliability for this community's 2,122 users.

Water and Environmental Program September 23, 2019

State	Sens.	Reps.	Recipient	Loans	Grants	Project Description
NJ	Cory Booker, Robert Menendez	Jeff Van Drew (02)	Borough of Woodbine	\$957,000	\$924,530	This Rural Development investment will be used to provide additional funding for the extension of the water distribution system along Fidler Hill Road. It will extend the borough's water system within the municipal airport complex to provide looping of an existing dead-end water main, and upgrades of various components of the borough's water supply and treatment plant. Additional work includes providing automatic valving and controls for the pressure filters, providing temporary pressure filters during construction, the addition of a substantial amount of storm drainage improvements at the existing water plant site and including air relief valves on the water main extension portion of the project. This additional list of work items also increased the basic engineering design fees and resident inspection services. The N.J. Department of Environmental Protection also decided that certain components of the water plant improvements will require permitting from their office, which was not originally anticipated in the original project scope. Because the Woodbine water plant exists within the boundaries of the Pinelands National Reserve, the N.J.-Pinelands Commission is also requiring that the adjacent borough-owned site next to the existing water plant be incorporated into the plant lot which requires additional surveying, mapping and permitting services from the design engineer.
NY	Kirsten Gillibrand, Charles Schumer	Tom Reed (23)	Town of Westfield	\$67,000	\$156,000	This Rural Development Investment will be used to construct a new water distribution system for water benefit district #1 located in the town of Westfield, N.Y. This will connect to the existing water main that serves the Barcelona area. The village of Westfield Water Treatment Plant will provide treated water to the proposed water benefit district. The village of Westfield will also store the water in tanks located in the village as well as be responsible for the distribution network operation and maintenance. The portion of the water service from the right-of-way to the main line will be the responsibility of the district, while the portion of the right-of-way to the home will be the responsibility of the homeowner. This water system will be a new water benefit district (NYS Route 5 Water Benefit District No. 1) which will be responsible for its own debt service, water cost and O&M fees. The health and safety items noted by the Department of Health will be addressed with the construction of this new public water distribution system.

Water and Environmental Program September 23, 2019

State	Sens.	Reps.	Recipient	Loans	Grants	Project Description
NY	Kirsten Gillibrand, Charles Schumer	Elise Stefanik (21)	Town of Potsdam	\$3,100,000	\$2,391,000	This Rural Development investment will be used to finance sewer facility improvements for the town of Potsdam located in the northern part of the St. Lawrence County, N.Y. This project includes a refurbishment of the original, extended aeration package with addition of a third blower and upgraded instrumentation/controls. It will also have a new and separate collection system including 12,500 feet of gravity sewer, 11,000 feet of force main and four pumping stations.
NY	Kirsten Gillibrand, Charles Schumer	Elise Stefanik (21)	Town of Louisville	\$4,060,000	\$1,730,000	This Rural Development investment will be used to construct a distribution system for the proposed water district #4 in the town of Louisville located in St. Lawrence County, N.Y. The residents have ongoing problems with water levels in their wells. The proposed project is to extend public water service from the adjacent water district #3 to the proposed service area. The town would like to provide reliable water service to these residents. These water districts obtain water from the St. Lawrence River and water is treated by a filter plant located within the town.
OH	Sherrod Brown, Rob Portman	Bill Johnson (06), Bob Gibbs (07)	Tuscarawas County	\$2,232,000	\$1,443,000	This Rural Development investment will be used to modernize and improve the Wilkshire Hills water treatment facility, first constructed in the late 1970s. The aging distribution system has undergone several expansions in the last 30 years and now incorporates Mineral City, Sandy Township, the Lawrence Township Industrial Park, Tuscarawas Valley Local Schools, and Sandyville and the Sandy Valley Local School District. Wilkshire Hills currently is extending a line into Zoarville, located several miles south of the plant. Improvements to the facility will include the addition of a third supply well and installation of new pressure filtration equipment and master meters. All improvements will support current operations and bolster future system growth, including a planned expansion into the neighboring village of Bolivar.

Water and Environmental Program September 23, 2019

State	Sens.	Reps.	Recipient	Loans	Grants	Project Description
OR	Jeff Merkley, Ron Wyden	Kurt Schrader (05)	Seal Rock Water District	\$9,096,000	\$2,799,500	This Rural Development investment will be used to establish a reliable water source and build infrastructure to treat drinking water for the rural community of Seal Rock, Ore. This water source is vulnerable to failure as a result of storms and earth movement. The treated water travels approximately 10 miles from Toledo through areas prone to landslides and flooding. In the event of a natural disaster, the line is difficult to access and repair. The most favorable solution is to develop the district's own primary water supply from Beaver Creek. The funds will be used to construct a treatment plant that uses membrane filtration to clean the water, install a water pipeline, build a 500,000-gallon reservoir, install submersible pumps in Beaver Creek, and install backup power generators. The treatment plant will be located on district-owned property above the tsunami impact zone. The facilities will be designed taking into consideration Ore.'s Resiliency Plan, which includes rapid recovery measures. This municipal water project will provide the district with a reliable water source and infrastructure that is built to new seismic and tsunami resiliency standards while addressing the state's rapid recovery goals, ensuring safe drinking water for this rural community of 4,340 people.
PA	Robert Casey, Patrick Toomey	Matt Cartwright (08)	South Wayne County W and S	\$6,251,000	\$4,210,000	This Rural Development investment will be used to make improvements and upgrades to the existing wastewater treatment plant located in the Lake and Salem Townships of Lake Ariel, Pa. The treatment plant serves 3,299 residential equivalent dwelling units. Upgrades and rehabilitation will include a new sludge dewatering system to replace the current belt press and to replace the chemical disinfection process over to ultraviolet filter. Other equipment such as blowers and pumps will be replaced with newer, more efficient, equipment. The wastewater treatment plant is over 40 years old and has reached its useful life.
VA	Tim Kaine Mark Warner	Morgan Griffith (09)	Scott County PSA	\$1,497,000	\$3,185,000	This Rural Development investment will be used to provide sanitary sewer to residents in the Hiltons and Yuma communities of Scott County. Residents are currently served by individual septic systems which are failing, and many pipe raw waste directly above ground. This creates a human health hazard, and this project will correct the hazard. The project is identified as Hiltons Phase 3 and Yuma Phase 4 and will provide sanitary sewer to residents in those communities. Construction includes a gravity sewer line, force main, manholes, residential grinder pumps, a sewer grinder pump station with generator, one pump station and related appurtenances.
WA	Maria Cantwell, Patty Murray	Dan Newhouse (04)	Town of Coulee Dam	\$304,000	\$909,000	This Rural Development investment will be used to provide subsequent funding needed to finance a wastewater treatment facility. The project was originally funded in April of 2016 and July of 2017 prior to bid award. More funding was needed for lift stations that were not part of the original bid but still necessary for the proper intent and design of the treatment plant facility.

Water and Environmental Program September 23, 2019

State	Sens.	Reps.	Recipient	Loans	Grants	Project Description
WV	Joe Manchin, Shelley Capito	Carol Miller (03), Alex Mooney (02)	Town of Winfield	\$8,840,000		This Rural Development investment will be used to upgrade the wastewater treatment plant. It involves the construction of a new headworks structure with mechanical bar screen with screening processing, a vortex grit removal system with classifier, two sequencing batch reactors (SBR's), ultraviolet disinfection equipment, a new operations building with belt filter press, polymer feed equipment, lime feed and mixing equipment, solids cake pump, and emergency standby generator with automatic transfer switch, and upgrades to one existing lift station. Site work will include grading, piping, storm drainage, sidewalks, fencing, bollards and all other work-related items. The work shall include all necessary mechanical, electrical, instrumentation and controls, SCADA, spare parts and accessories, civil structural, architectural, and other items needed to provide a complete, fully tested and operable system. This investment will benefit 1,055 residential users and 64 businesses.
			TOTAL	\$106,974,621	\$36,683,580
