

Water and Environmental Program May 13, 2019

State	Sen.	Rep.	Recipient	Loans	Grants	Project Description
AL	Richard Shelby, Doug Jones	Mike Rogers (03)	Clay County Water Authority	\$2,973,000	\$3,388,000	This Rural Development investment will be used to provide additional funding for the Clay County Water Authority's expansion project. Many residents in rural Clay County rely on private wells that have varying degrees of minerals and containments and sometimes have no water during drought conditions. The water treatment system and distribution mains were constructed in 1972 and are in need of improvements to alleviate low water pressure areas and dead-end lines. This investment will provide safe, affordable drinking water more than 2,000 residential customers and 43 small businesses. Previous funding includes a \$9,830,000 Rural Development loan and grant combination.
AL	Richard Shelby, Doug Jones	Bradley Byrne (01)	Town of Loxley	\$4,825,000	\$4,723,000	This Rural Development investment will be used to improve the town of Loxley's wastewater system. This project will help prevent overflow from the treatment plant into the Corn Branch tributary during heavy rains. The plant has been in operation for more than 40 years, providing service to 811 residential and 128 commercial customers. Additional funding includes an \$18,000 Rural Development grant and a \$7,000 applicant contribution.
AL	Richard Shelby, Doug Jones	Martha Roby (02)	City of Clio	\$126,000	\$355,000	This Rural Development investment will be used to make sewer system upgrades, including a wastewater treatment lagoon with an ammonia removal system. The sewer treatment plant has been in operation for 40-plus years and provides service to 440 residential and 34 commercial customers in the city of Clio. These improvements will allow the city's wastewater treatment plant operations to comply with environmental discharge requirements.
AL	Richard Shelby, Doug Jones	Terri Sewell (07)	South Marengo County Water & Fire Protection Authority	\$123,000		This Rural Development investment will provide additional financing to replace 3-inch water lines with 6-inch lines to address low-water-pressure issues during peak usage times. The South Marengo County Water & Fire Protection Authority serves 1,871 residential and 78 commercial customers in Marengo County. Previous funding includes \$2,355,000 in Rural Development loans and grants.
AL	Richard Shelby, Doug Jones	Martha Roby (02)	Town of Autaugaville	\$100,000	\$300,000	This Rural Development investment will provide additional financing to improve the town of Autaugaville's wastewater treatment facility. In addition, wastewater service will be extended to 35 new residential customers. Structural and mechanical upgrades are required due to the age and condition of the system and to help ensure it meets safety standards. This treatment plant serves 192 residential and 31 commercial customers in rural Autauga County. Previous funding includes \$754,000 in Rural Development loans and grants.
AL	Richard Shelby, Doug Jones	Mike Rogers (03)	Water Works and Sewer Board of the Town of Hurtsboro	\$411,000	\$332,000	This Rural Development investment will be used to upgrade the sewer system. The project will replace four pumps, control equipment, pump station housing, and collection lines. The upgrades are required due to the age and condition of the facility. The sewer treatment plant has been in operation for more than 30 years, providing service to 270 residential and three commercial customers in Russell County. Hurtsboro has a population of 553.

Water and Environmental Program May 13, 2019

State	Sen.	Rep.	Recipient	Loans	Grants	Project Description
AZ	Krysten Sinema, Martha McSally	Paul A. Gosar (04)	Town of Quartzsite Municipal Property Corporation	\$1,754,000		This Rural Development investment will be used to expand the Quartzsite wastewater treatment plant to allow additional flows, add a sequencing batch reactor basin, construct additional sludge drying beds, add a polymer system to increase bed performance, and make other improvements. This expansion will allow the plant to meet specified water quality standards, lower nitrate levels, increase capacity, and retire older septic systems. Additional funding includes a \$7,683,483 Rural Development loan and grant combination and \$1,653,112 from the Water Infrastructure Finance Authority of Arizona.
GA	David Perdue, Johnny Isakson	Buddy Carter (01)	City of Blackshear	\$962,000		This Rural Development investment will be used to provide additional financing for wastewater treatment plant improvements. These include land application system upgrades, infiltration/inflow reduction involving gravity sewer pipeline rehabilitation, and demolition of two wastewater treatment facilities. This project will serve 1,321 residential users. Previous funding is a \$7,737,000 Rural Development loan and grant combination.
ID	James Risch, Mike Crapo	Russ Fulcher (01)	Garden Valley Ranchettes Homeowners Association Inc.	\$165,000	\$327,000	This Rural Development investment will be used to drill a replacement well and upgrade the water system to eliminate high fluoride levels in the existing water source. The project will provide the 48 residents of the Garden Valley Ranchettes Homeowners Association with reliable water quantity and quality.
IL	Tammy Duckworth, Richard Durbin	John Shimkus (15)	Fort Massac Water District	\$1,256,000		This Rural Development investment will be used to upsize seven miles of waterline for the Fort Massac Water District. This increase will improve flow and functionality of the water system, which provides service to 2,395 users in parts of Massac, Pope and Pulaski counties.
IL	Tammy Duckworth, Richard Durbin	Rodney Davis (13)	City of Gillespie	\$600,000	\$400,000	This Rural Development investment will be used to provide additional funding to renovate 25 miles of 6-inch and 8-inch PVC water mains throughout the cities of Gillespie and East Gillespie. In addition, the investment will be used to repair the spillway and replace 1,743 residential meters. This project will alleviate a health hazard and will provide potable water to more than 1,700 households. Previous funding includes a \$10 million Rural Development loan and grant combination.
IL	Tammy Duckworth, Richard Durbin	John Shimkus (15)	EJ Water Cooperative Inc.	\$333,000		This Rural Development investment will be used to provide additional financing to construct 35 miles of water main for 75 new residential users in Cumberland, Shelby and Christian counties. This project will alleviate health and sanitary issues and will supply potable water to this previously underserved area. Additional funding includes \$1,308,000 in Rural Development loans, a \$500,000 Community Development Block Grant, and \$30,000 in tap fees.
IN	Todd Young, Mike Braun	Larry Bucshon (08)	Town of West Terre Haute	\$237,000	\$540,500	This Rural Development (RD) investment will be used to provide additional funds to upgrade meters, lines and mains. Additional federal assistance includes \$4 million in RD loans and grants and an \$83,500 applicant contribution.

Water and Environmental Program May 13, 2019

State	Sen.	Rep.	Recipient	Loans	Grants	Project Description
IN	Todd Young, Mike Braun	Trey Hollingsworth (09)	City of Salem	\$1,895,000		This Rural Development investment will provide additional financing to improve the city of Salem's water system. The water system is under an Agreed Order with the Indiana Department of Environmental Management for water quality violations and does not meet the capacity requirements of the Recommended Standards for Water Works. In addition, many system components are beyond their useful life. These factors pose a safety risk to employees and a health risk to customers. The project will address these health and sanitary issues by optimizing the treatment process to meet water quality regulations and replacing equipment and treatment components to achieve safety, health and capacity requirements defined by regulatory standards. Additional funding includes a \$12,888,000 Rural Development loan and a \$383,169 applicant contribution.
KY	Mitch McConnell, Rand Paul	James Comer (01)	City of Central City	\$4,020,000	\$1,480,000	This Rural Development investment will be used to provide additional financing to expand the wastewater treatment plant from 1.2 to 1.8 million gallons per day. The expansion will include the replacement and/or addition of several vital components of the plant, pump station and deteriorating sewer lines in downtown Central City. These improvements will bring the system into compliance with the state's Division of Water. This project will allow the city to provide a safe and sanitary means of waste disposal for 1,896 customers in rural Muhlenberg County. Previous funding for this project included a \$13,150,000 Rural Development loan and grant combination, a \$1 million Housing and Urban Development Community Development Block Grant, a \$500,000 Kentucky Transportation Cabinet Transportation Alternatives Grant, and \$350,000 from the Muhlenberg County Board of Education.
KY	Mitch McConnell, Rand Paul	S. Brett Guthrie (02)	City of Leitchfield	\$4,539,000	\$961,000	This Rural Development investment will be used to provide additional funding to construct a new 4-million-gallons-per-day water treatment plant on a site adjacent to an existing plant. The existing plant must be replaced due to structural deficiencies and its inability to meet capacity and water quality regulations from the Division of Water. The new plant will be more efficient and will be able to meet current and future demands, as well as comply with more stringent water quality regulations. The city of Leitchfield serves 2,896 customers in rural Grayson County. Previous funding includes an \$8 million Rural Development loan and grant combination.
KY	Mitch McConnell, Rand Paul	Andy Barr (06)	Jessamine-South Elkhorn Water District	\$245,000		This Rural Development investment will be used to replace 479 manual read meters with mobile read capability meters for customers in the southeast service area. Once the replacements are made, the customers will achieve compliance with Public Service Commission requirements and have accurate and efficient monitoring of water usage and loss in rural Jessamine County.
KY	Mitch McConnell, Rand Paul	James Comer (01)	City of Sebree	\$700,000	\$250,000	This Rural Development investment will be used to replace approximately 9,000 linear feet of aged, deteriorating sanitary sewer line, along with a retaining wall. These improvements will protect the city's sewer main, stabilize the creek bank, and provide cover for exposed pipe at several creek crossings that will reduce inflow and infiltration from failing water lines. The project will provide safe and sanitary means of waste disposal for 517 customers in rural Webster County.

Water and Environmental Program May 13, 2019

State	Sen.	Rep.	Recipient	Loans	Grants	Project Description
ME	Susan Collins, Angus King	Jared Golden (02)	Town of Norridgewock	\$240,000	\$85,000	This Rural Development investment will be used to improve the town's wastewater treatment facility and three sewer pump stations. The sewer system serves residents, businesses and public facilities in the town of Norridgewock. The system serves 314 households, 24 businesses and six public facilities. The wastewater treatment facility and pump stations have reached the end of their useful life. Upgrades are required to ensure the town will meet clean water standards required by the Maine Department of Environmental Protection. The residents and businesses in Norridgewock, which has a population 3,367, will receive improved and reliable wastewater services for many years. Norridgewock's wastewater system plays an important role in preserving the waters of the Kennebec River watershed. The river is the state's second largest and is an important environmental, recreational and economic resource for Norridgewock and many other communities along its 170-mile run to the Atlantic Ocean. In addition, the Kennebec River is listed as critical habitat for the endangered Atlantic salmon. Previous funding includes \$5 million in Rural Development loans and grants.
MI	Gary Peters, Debbie Stabenow	Bill Huizenga (02)	City of Ludington	\$6,014,000		This Rural Development investment will be used to provide additional financing for wastewater treatment plant improvements. The city was under a violation notice from the Michigan Department of Environmental Quality since December 13, 2017, regarding the limits of ammonia nitrogen discharges from the wastewater treatment plant. The collection system treats sewage from Ludington, the city of Scottville, portions of Pere Marquette township, Hamlin township and Amber Township. The city will revise the aerated lagoon, reconfigure another lagoon, and make plant improvements. The sewer system serves 5,087 residential and 1,051 commercial users. Additional funding includes a \$17,900,000 Rural Development loan and an \$847,600 Michigan Stormwater Asset Management grant.
MI	Gary Peters, Debbie Stabenow	Paul Mitchell (10)	City of Croswell	\$3,250,000	\$6,750,000	This Rural Development investment will be used to make additional improvements to the city of Croswell's sewer system. The city will install slip lining, replace pipes and make improvements to the wastewater treatment plant. The upgrades include replacing the final clarifier No. 1, improving the grit removal process, replacing a pump, building upgrades, and installing fencing and an energy recovery system. This is Phase 2 for the sewer improvement project. Phase 1 was obligated in 2018 and was comprised mainly of improvements to the collection system that showed more severe inflow/infiltration problems. This project will allow the city to achieve compliance with state environmental guidelines. The sewer system serves 962 residential and 28 commercial customers.
MI	Gary Peters, Debbie Stabenow	Fred Upton (06)	Village of Vicksburg	\$8,412,000		This Rural Development investment will be used to construct and replace interceptor pipes, replace and repair pump and lift stations, and upsize the force main. This project will significantly improve the capacity, reliability and performance of the Village of Vicksburg's wastewater collection and treatment system.

Water and Environmental Program May 13, 2019

State	Sen.	Rep.	Recipient	Loans	Grants	Project Description
MI	Gary Peters, Debbie Stabenow	Daniel Kildee (05)	Village of Akron	\$667,000		This Rural Development investment will be used to improve the village of Akron's sewer collection system. There have been no major improvements to the collection system since its construction in the 1970s. The pump station must also be replaced as it has reached the end of its useful life. In addition, 10 relief valves which have not been functional for more than 30 years will be replaced. The sewer system serves 165 residential and 16 commercial customers.
MO	Roy Blunt, Josh Hawley	Jason Smith (08)	City of Mansfield	\$300,000		This Rural Development investment will provide additional funding for improvements to the city of Mansfield's water system. The system is aging and experiencing high water loss. Improvements will correct this issue and add a second storage tank, allowing for easier maintenance and backup storage. Mansfield provides water and sewer service to nearly 1,300 customers. Previous funding includes a \$1,967,000 Rural Development loan and grant combination, a \$500,000 Community Development Block Grant and a \$180,650 applicant contribution.
MS	Roger Wicker, Cindy Hyde-Smith	Trent Kelly (01)	Ingomar Water Association Inc.	\$229,000		This Rural Development investment will provide additional funds to replace approximately 900 water meters with radio read meters. Upgrades and improvements will also be made to more than 26,000 linear feet of service lines. The project will benefit more than 900 residential and non-residential consumers by providing improved water service. Previous funding was a \$903,000 Rural Development loan.
MS	Roger Wicker, Cindy Hyde-Smith	Steven Palazzo (04)	Clara Water Association Inc.	\$1,134,100		This Rural Development investment will be used to construct two water supply wells with associated water transmission mains, and install a generator for backup power for the wells. The only operational well risks leaving customers without water should it fail. The aging infrastructure creates a lack of a water supply at adequate pressures, which presents a potential for health threats and violates the health department requirement for a redundant water source. The project will provide more than 600 customers with a continuous backup power supply in the event of well failure or power outages and will reduce costs and energy consumption. Finally, the improvements will provide a safe, clean and healthy potable water supply.
MS	Roger Wicker, Cindy Hyde-Smith	Bennie G. Thompson (02)	Coahoma County Utility District # 2	\$580,000	\$449,000	This Rural Development investment will be used to improve the water supply for Coahoma County Utility District #2. The district will build a 300-gallon-per-minute water supply well, a 30,000-gallon pressure tank, a concrete block well house and install an emergency standby generator. In addition, 223 customers will have their meters replaced with automatic read meters. These improvements will enable the district to provide its own water supply, control rates and improve water quality.
NC	Thom Tillis, Richard Burr	Mark Meadows (11)	City of Marion	\$586,000		This Rural Development investment will be used to improve and repair storm water facilities near the community park and town hall in the city of Marion. The upgrades will prevent further development of sinkholes in the area.

Water and Environmental Program May 13, 2019

State	Sen.	Rep.	Recipient	Loans	Grants	Project Description
NE	Deb Fischer, Ben Sasse	Adrian Smith (03)	City of Terrytown	\$134,000		This Rural Development investment will be used to provide additional funding for the city of Terrytown's water improvement project. Terrytown will connect to the city of Gering's water supply, install water meters and replace water mains. This infrastructure improvement will eliminate health concerns and allow the city to efficiently provide water services to its 1,573 residents. Previous funding included a \$1,189,000 Rural Development loan and grant combination, \$1,320,700 from the State of Nebraska's Revolving Fund, a \$250,000 Community Development Block Grant and a \$377,000 applicant contribution.
NE	Deb Fischer, Ben Sasse	Adrian Smith (03)	Village of Oakdale	\$33,000	\$8,900	This Rural Development investment will be used to provide additional funding to furnish and replace the old water meters for this community's 132 users. Funds will also be used to construct a municipal groundwater supply well. Previous funding included a \$385,100 Rural Development loan and grant combination and a \$250,000 Community Block Development Grant.
NY	Kirsten Gillibrand, Charles Schumer	Chris Collins (27)	Town of Ridgeway	\$334,000	\$720,000	This Rural Development investment will be used to create Water District #14 in the town of Ridgeway in Orleans County. This project will extend public water service to 30 homes in the town that do not have safe, potable water. Water quality testing indicates a significant portion of residents' individual wells have coliform and E. coli contamination. The health department indicates these wells do not meet standards and are a threat to residents' health. Completing this project will address the code issues, alleviate the health problems and provide reliable water service to the residents.
NY	Kirsten Gillibrand, Charles Schumer	Chris Collins (27)	Town of Leroy	\$89,000	\$34,000	This Rural Development investment will be used to build the Water District #11 in the town of LeRoy, in Genesee County. This project will extend public water service to eight residential users in the town who currently do not have safe, potable water. The investment will eliminate health concerns, lower costs and provide better water quality and quantity, as well as fire protection.
NY	Kirsten Gillibrand, Charles Schumer	John Katko (24)	Town of Sennett	\$1,187,000		This Rural Development investment will be used to improve Water District #3 in the town of Sennett. A water main extension will be built to connect to water mains in Districts #1 and #3. In addition, a water tank will be removed and be replaced with a 300,000-gallon water storage tank that has an overflow elevation of 806 feet above sea level. This will allow for a future interconnection with the town of Brutus to the north, thereby providing an alternate water source, if needed. The project will also allow for back-feeding into the town of Sennett Water District #1 in case the supply of water from the city of Auburn is temporarily interrupted. This project will provide safe, reliable drinking water to 621 residents.
NY	Kirsten Gillibrand, Charles Schumer	Tom Reed (23)	Town of Junius	\$441,000		This Rural Development investment will be used to construct Water District #3 in the town of Junius. The project will extend public water service to 113 residents and provide them with a safe, reliable and potable water supply.

Water and Environmental Program May 13, 2019

State	Sen.	Rep.	Recipient	Loans	Grants	Project Description
OH	Rob Portman, Sherrod Brown	Bill Johnson (06)	Hecla Water Association	\$4,899,000	\$2,900,000	This Rural Development investment will be used to improve the Hecla Water Association's 38-year-old water treatment plant in the Lawrence County village of Athalia. Along with modernizing the filtering, electrical and mechanical systems, improvements will be made to administrative areas of the building, increasing the overall footprint by about 2,000 square feet. In addition, nearly 4,000 square feet of removable flood control walls will be installed at the site to offer added protection to the facility during adverse water events. In its 50 years of service to rural Ohioans, Hecla Water has grown substantially and moves nearly three million gallons of safe, clean drinking water each day to its 13,000 customers. Previous funding includes a Rural Development loan and grant combination of \$3.7 million and a \$1,101,000 applicant contribution.
PA	Patrick Toomey, Robert Casey	Mike Kelly (16)	West Sunbury Borough Municipal Authority	\$256,000	\$369,000	This Rural Development investment will be used to install equipment and filters to upgrade the sewage treatment plant. The improvements are needed to meet state requirements. The project will serve 130 customers in the borough of West Sunbury, portions of Clay Township and the Dassa McKinney Elementary School in Concord Township.
TN	Lamar Alexander, Marsha Blackburn	David Kustoff (08)	Town of Rutherford	\$740,000		This Rural Development investment will be used to construct a 100,000-gallon clear well or pre-sedimentation basin at the water treatment plant in Rutherford. The well will be constructed of pre-stressed concrete and glass-coated steel that will withstand seismic events and normal weathering. Also, the new well will more effectively remove sediment from water. This project will serve Rutherford's 1,140 residents. Additional funding is from a \$420,032 Community Development Block Grant.
VA	Tim Kaine, Mark Warner	Morgan Griffith (09)	Town of Pearisburg	\$88,000		This Rural Development investment will be used to provide additional financing to improve the town's sewer system. The collection system consists mainly of leaking and damaged terra cotta pipe. Overflows of raw sewage occur, thereby creating a public health hazard. This project will repair the hazard, replace chlorine gas disinfection with an ultraviolet disinfection system, replace approximately 6,000 linear feet of pipe, and install manholes and other related appurtenances. The sewer system serves approximately 1,300 residential and commercial connections. Previous funding includes \$1.5 million in Rural Development loans and grants and a \$3,800 applicant contribution.
WA	Patty Murray, Maria Cantwell	Kim Schrier (08)	Alpine Acres Community Association	\$331,000	\$358,000	This Rural Development investment will be used to provide additional financing for water system improvements for 72 connections at the Alpine Acres Community Association in an unincorporated area of rural Chelan County. Improvements will include the replacement of 2- and 4-inch steel lines with new 4- and 6-inch lines, hydrants and individual service meters, as well as a new 33,200-gallon concrete tank. Also, funding will allow for the installation of an emergency backup power generator and transfer switch, as well as the upgrade of a pump house with new plumbing, chlorination and electrical improvements. Previous funding includes a \$946,000 Rural Development loan and grant combination, and a \$75,000 applicant contribution.

Water and Environmental Program

May 13, 2019

State	Sen.	Rep.	Recipient	Loans	Grants	Project Description
WV	Shelley Capito, Joe Manchin	David McKinley (01)	Washington Pike Public Service District	\$2,225,000		This Rural Development investment will be used to upgrade and replace infrastructure that serves approximately 1,383 customers (1,371 residential and 12 commercial). The funding will provide an emergency water supply, construct an office and maintenance garage, and update the telemetry with new, more accurate technology.
TOTAL				\$57,433,100	\$24,730,400
