Cooperative Information Report 1, Section 26, Part II

January 2015

FARMER, RANCHER, AND FISHERY COOPERATIVE HISTORICAL STATISTICS, 1951-1999

Over the years, statistics¹ on farmer, rancher, and fishery cooperatives have provided a measure of the extent to which cooperatives have been used to improve their owner's economic position. Statistics were first compiled on U. S. cooperatives around 1863, covering the operations of 35 cooperative cheese factories. By 1900, at least 1,223 active marketing and farm supply cooperatives existed in the United States.

First Nationwide Survey in 1913

The first nationwide survey of farmer cooperatives was undertaken by the Office of Markets and Rural Organization of the United States Department of Agriculture from 1913 to 1915.

¹ *As a historical report, this document relies on the work of many prior authors. J. Warren Mather and Katherine C. DeVille, Beverly L. Rotan and Jacqueline E. Penn moved much of the older format data into digital form. Charles A. Kraenzle was instrumental in converting the database from main frame computers to a desk top environment. Further data handling improvements have been developed by E. Eldon Eversull. For earlier data, see Part I and later data in Part III of this same series of Farmer, Rancher, and Fishery Cooperative Historical Statistics.*

The second nationwide survey of farmer

cooperatives was conducted in 1919 as part of the agricultural census by the Bureau of the Census of the United States Department of Commerce. Early in 1922, the Department of Agriculture began another nationwide survey of cooperative buying and selling.

Statistics on farmer cooperatives have been published each year since 1930. The 1936-37 survey was a joint effort by the Farm Credit Administration, 12 district banks for cooperatives, and 33 agricultural colleges.

1950s

Extensive changes were made in the 1950-51 survey to more accurately document the operations of regional cooperatives. The survey provided for allocation of the dollar business volume of each regional association to the States in which the farm products originated and the farm supplies were sold rather than crediting all of an association's business to the State in which the regional cooperative maintained its central office. Similar adjustments were also provided for membership figures. Equally important was the provision for reporting on the amount of business conducted among cooperatives, or inter-cooperative business.

Gross business volume includes inter-cooperative business, such as sales of farm products by a regional cooperative for a local member cooperative or sales of supplies by a regional to its member local. Net business volume excludes inter-cooperative business. The allocation of sales to the originating State and documentation of inter-cooperative business resulted in increased accuracy and use of the statistics.

Information on service cooperatives was first collected in 1951.

1960s and 1970s

Around 1960, the data were changed to reflect the addition of Hawaii and Alaska. Calendar years were used until 1978 and then changed to the cooperative's fiscal years. Fiscal years made the survey easier as the cooperative no longer had to convert their annual financial statements to calendar year data. Memberships still contained considerable duplication because many farmers were members of more than one cooperative, with an estimated average of about three memberships per active farmer.

Early surveys were mainly tabulated by pencil and paper. Manual, and then electric, calculators made the statistics easier to handle and tabulate. In the 1960s and 1970s, punch cards were used and the database was managed on a mainframe computer.

1980s and 1990s

Personal computers were first used in 1985 and the database was converted entirely from a COBOL mainframe language to dBase IV on personal computers. To further ease response burden, data collection focused on information readily available in cooperative financial reports. Full-time and part-time and seasonal employee numbers were added to the survey and membership information was still collected.

Cooperative Definition

USDA considers four major criteria in identifying an organization as a farmer-owned cooperative:

- (1) Membership is limited to persons producing agricultural and aquacultural products and to associations of such producers;
- (2) Cooperative members are limited to one vote regardless of the amount of stock or membership capital owned; or the cooperative does not

pay dividends on stock or membership capital in excess of 8 percent a year or the legal rate in the State, whichever is higher;

(3) Business conducted with non-members may not exceed the value of business conducted with members;

(4) The cooperative operates for the mutual interest of members by providing member benefits on the basis of patronage.

These criteria may result in larger or smaller numbers of farmer cooperatives than found in lists or directories of State agencies or cooperative councils.

Marketing cooperatives derive most (more than 50 percent) of their total dollar volume from the sale of members' products. These cooperatives are further classified into 1 of 13 commodities or commodity groups, depending upon which accounts for most of its business volume. Cooperative Programs may reclassify a cooperative into a different commodity category if its primary business volume changes significantly.

Supply cooperatives derive most (more than 50 percent) of their business volume from the sale of production supplies, machinery and equipment, and building materials. Many also handle farm, ranch and home items, such as heating oil, lawn and garden supplies and equipment, and food.

Service cooperatives provide specialized services related to the business operations of farmers, ranchers, or cooperatives, such as trucking, storing or drying.

Many cooperatives handle multiple commodities and provide marketing and supply services, as well as the facilities and equipment used to perform these services. These associations are classified according to the predominant commodity or function, as indicated by business volume.

Number, Membership, and Sales

Net sales were first collected in 1951 (Tables 1-23). Net sales do not include inter-cooperative sales (sales from one cooperative to another cooperative). Data collected from 1951 through 1999, encompassed gross and net business volume of cooperatives marketing 13 products. Information on the sales of 11 farm supplies was also collected from 1951 through 1989. In 1990, some farm supplies previously reported separately (farm machinery and equipment, building materials, containers and packaging supplies, meats and groceries, and general farm supplies) were combined into the “other farm supplies” category. This information was no longer collected as fewer cooperatives were selling these products.

Employee numbers were first collected in 1981, 1986, 1991 and then yearly from 1994. Information on full-time and part-time and seasonal employees was collected by cooperative type (Table 24).

Database Adjustments

Periodically, the database undergoes closer examination of classifications, and large numbers of cooperatives can be affected. In 1976, 688 associations were removed as these organizations were found to be patrons' associations formed around grain elevators and lumber yards for voting purposes and not acting as business organizations. In 1989, cotton ginning cooperatives were reclassified as service cooperatives. This decreased the number of cooperatives classified as cotton and significantly increased the number of cooperatives classified as service.

Business Volume Frequency

Business volume frequency by ten sales sizes was started in 1976 and reported annually in 1983 (Table 25). Cooperative market share for marketing and farm supply

cooperatives started in 1951 and ended in 2002 as the information necessary to maintain this series became less available from respondent cooperatives (Table 26).

Financial Profiles

Cooperative Programs conducted financial profiles of cooperatives in 1954, 1962, 1970 and 1976 that provided more detailed balance sheet and income statement information (Tables 27-28). These profiles included collection of benchmarking financial information.

Surveys from 1977 on asked cooperatives to include an annual or audit report so more detailed financial information could be documented.

State Data

In 1951, State information was reported on cooperative numbers, membership, and gross and net volume (Tables 29-36). State information allowed data to be reported by where a product was sold or marketed instead of where the cooperative was headquartered. This information was collected in odd years from then on (1953, 1955, etc.).

Organized and Discontinued Cooperatives

Collection of information on cooperatives that organized (or started operations) was begun in 1957 (Table 37). There are 10 different marketing classifications as well as information on farm supply and service cooperatives (table 17).

From 1957, data has been collected on the number of cooperatives that discontinued operations (went out of business for any of several reasons, Tables 38-39). Again, information collected includes 10 different marketing classifications and also farm supply and

service cooperatives (table 18).

The tables in this report provide the reader useful data. Figures allow visual presentations of the data and often trends not apparent in tabular presentations can be detected. Some of the tables in this

publication have associated figures and are presented in the final section of this report (figures 1-10).

Bibliography

The following authors have been involved with one or more of the past Cooperative Historical Statistics: J. Warren Mather, Charles A Kraenzle, Celestine C. Adams, Katherine C. DeVille, Jacqueline E. Penn, Ralph R. Richardson, Beverly L. Rotan, and E. Eldon Eversull.

Cooperative Historical Statistics, CIR 1, Section 26, USDA, Washington, DC, was published in May 1984, May 1989, May 1994, April 1998, and August 2004.

Special financial profiles were conducted in 1954, 1962, 1970, 1976, 1987, 1997, and 2008. Information from the following reports provided financial information for the above time periods:

Eversull, E. Eldon, Cooperative Financial Profile, 2008, RD RR 222, USDA, Washington, DC, April, 2011.

Griffin, Nelda, A Financial Profile of Farmer Cooperatives in the United States, FCS RR 23, USDA, Washington, DC, October 1972.

Griffin, Nelda, Roger A. Wissman, William J. Monroe, Francis P. Yager, and Elmer Purdue, The Changing Financial Structure of Farmer Cooperatives, ESCS RR 17, USDA, Washington, DC, March 1980.

Hulbert, Helim H., Nelda Griffin, and Kelsey B. Gardner, Methods of Financing Farmer Cooperatives, FCS GR 32, USDA, Washington, DC, June 1957.

Rathbone, Robert C., and Roger A. Wissman, Farmer Cooperatives' Financial Profile, 1997, U.S. Department of Agriculture, Rural Business-Cooperative Service, Research Report 171, April 2000.

Royer, Jeffery S., Roger A. Wissman, and Charles A. Kraenzle, Farmer Cooperatives' Financial Profile, 1987, U.S. Department of Agriculture, Agricultural Cooperative Service, Research Report 91, September 1990.

Author, E. Eldon Eversull, Senior Agricultural Economist

¹ Cotton ginning cooperatives were reclassified as service cooperatives in 1989 and then reclassified again as marketing cooperatives in 2000.

² Livestock and poultry are combined from 1981 through 1999.

³ Other marketing cooperatives included bean and pea, fish, and nut cooperatives from 1981 through 1999.

⁴ Artificial insemination cooperatives were reclassified as farm supply instead of service cooperatives in 2000.

¹ May not add due to rounding.

² Includes farmer-members (entitled to vote for directors) but not nonvoting patrons. Duplication in these membership figures occurs because many farmers belong to more than one cooperative. Totals may not add due to rounding.

³ Cotton ginning cooperatives were reclassified as service, not cotton cooperatives in 1980.

⁴ Excludes soybean meal and oil.

⁵ Includes sugar, sugarcane, sugar beets, honey, maple syrup, molasses, and sorghum.

⁶ Includes forest products, hay, hops, nursery stock, coffee, and other farm products not separately classified.

⁷ Cooperatives providing services related to marketing or purchasing activities. Major services provided are cotton ginning, trucking, storing, grinding, drying, and artificial insemination.

¹ May not add due to rounding.

² Includes farmer-members (entitled to vote for directors) but not nonvoting patrons. Duplication in these membership figures occurs because many farmers belong to more than one cooperative. Totals may not add due to rounding.

³ Cotton ginning cooperatives were reclassified as service, not cotton cooperatives in 1980.

⁴ Excludes soybean meal and oil.

⁵ Includes sugar, sugarcane, sugar beets, honey, maple syrup, molasses, and sorghum.

⁶ Includes forest products, hay, hops, nursery stock, coffee, and other farm products not separately classified.

⁷ Cooperatives providing services related to marketing or purchasing activities. Major services provided are cotton ginning, trucking, storing, grinding, drying, and artificial insemination.

¹ May not add due to rounding.

² Includes farmer-members (entitled to vote for directors) but not nonvoting patrons. Duplication in these membership figures occurs because many farmers belong to more than one cooperative. Totals may not add due to rounding.

³ Cotton ginning cooperatives were reclassified as service, not cotton cooperatives in 1980.

⁴ Excludes soybean meal and oil.

⁵ Includes sugar, sugarcane, sugar beets, honey, maple syrup, molasses, and sorghum.

⁶ Includes forest products, hay, hops, nursery stock, coffee, and other farm products not separately classified.

⁷ Cooperatives providing services related to marketing or purchasing activities. Major services provided are cotton ginning, trucking, storing, grinding, drying, and artificial insemination.

¹ May not add due to rounding.

² Includes farmer-members (entitled to vote for directors) but not nonvoting patrons. Duplication in these membership figures occurs because many farmers belong to more than one cooperative. Totals may not add due to rounding.

³ Cotton ginning cooperatives were reclassified as service, not cotton cooperatives in 1980.

⁴ Excludes soybean meal and oil.

⁵ Includes sugar, sugarcane, sugar beets, honey, maple syrup, molasses, and sorghum.

⁶ Includes forest products, hay, hops, nursery stock, coffee, and other farm products not separately classified.

⁷ Cooperatives providing services related to marketing or purchasing activities. Major services provided are cotton ginning, trucking, storing, grinding, drying, and artificial insemination.
