Biobased Success Story

Houston Uses Biobased Products

Perry Rainosek, Administrative Officer at the Children's Human Nutrition Research Center in Houston Texas, used Biobased products.

InVade technology Bio Drain was used to unclog drains and pipes In the kitchenette and it worked very well. InVade probiotic cleaners use natural, soil derived microbes to digest organic matter and eliminate odors. They digest fats, oils, grease, carbohydrates, proteins, cellulose and urea.

Fresh 105 Spray Bio Conqueror G Mango is used for floor cleaning regularly by Housekeeping. It is a liquid bioactive concentrated formula that eliminates odors. High fragrance, surfactants, and bacterial concentrations clean and consume mal odors. Seven fragrances are available.

Farnam Leather New by Santa Cruz Biotechnology is a leather conditioner and restorer that did a good job of reconditioning the leather chairs. It is a blend of natural and synthetic oils containing no silicones, waxes or petroleum distillates, that was developed for horse care.
