July 8, 2010

I, Donald H. Andersen, Mayor of the City of West Wendover, certify that the infrastructure investment for the West Wendover Reclamation Facility Upgrade Phase 2 has been properly approved as required by law and that I accept responsibility that the infrastructure investment is an appropriate use of taxpayer dollars.

The project will provide for the necessary upgrade of the West Wendover Reclamation Facility including the use of new and more efficient Membrane Bioreactor (MBR) technologies for the water treatment process. This upgrade will improve the quality of effluent reuse water to meet impending NDEP permit requirements, increase the capacity from 1.0 to 2.0 MGD, with a peak hour capacity of 4.0 MGD and provide high quality reuse water as an end product thus continuing and improving upon our water recycling program.

Total cost of the project is \$10,309,800, with \$2,637,000 being USDA Rural Development (ARRA) Funds.

**Certifying Authority**
