## Rural Business-Cooperative Programs

The U.S. Department of Agriculture (USDA) prohibits discrimination against its customers. If you believe you experienced discrimination when obtaining services from USDA, participating in a USDA program, or participating in a program that receives financial assistance from USDA, you may file a complaint with USDA. Information about how to file a discrimination complaint is available from the Office of the Assistant Secretary for Civil Rights.

To file a complaint of discrimination, complete, sign and mail a program discrimination complaint form, available at any USDA office location or online at www.ascr.usda.gov, or write to:

USDA
Office of the Assistant Secretary for Civil Rights
1400 Independence Avenue, S.W.
Washington, D.C. 20250-9410
Or call toll free at (866) 632-9992 (voice) to obtain additional information, the appropriate office or to request documents. Individuals who are deaf, hard of hearing or have speech disabilities may contact USDA through the Federal Relay service at (800) 877-8339 or (800) 845-6136 (in Spanish). USDA is an equal opportunity provider, employer and lender.

Persons with disabilities who require alternative means for communication of program information (e.g., Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD).

## ABSTRACT

A survey of 2,186 U.S. farmer, rancher, and fishery cooperatives ending their business year during calendar year 2013 showed a record business volume and net income before taxes. Gross business volume was $\$ 246$ billion, while net business volume was $\$ 209$ billion and net income before taxes totaled $\$ 6.2$ billion. These cooperatives had almost $\$ 83$ billion in assets, $\$ 48$ billion of liabilities, and $\$ 35$ billion in equity. Cooperatives were a major employer in rural areas, with 136,000 full-time workers and 55,000 part-time or seasonal employees. Business
volume by commodity is reported for all cooperatives. Number of cooperatives, cooperative memberships, and number of employees are classified according to whether the business is a marketing, supply, or service cooperative. Trends in cooperative numbers, memberships, employees, business size, sales volume, net income, assets, liabilities, and net worth are reported.

Keywords: cooperatives, statistics, business volume, employees, memberships, balance sheet, income statement, financial ratios.

## Service Report 75

November 2014

## PREFACE

Cooperative statistics are collected annually to provide information on the progress and trends among the Nation's farmer, rancher, and fishery cooperatives. These statistics are used for research, technical assistance, education, planning, and public policy. The collection, analysis, and dissemination of cooperative statistics by the United States Department of Agriculture (USDA) are authorized by the Cooperative Marketing Act of 1926.

This report provides aggregate information on the number, membership, business volume, net income, basic balance sheet items, and full-time and parttime and seasonal employees of cooperatives for business years ending in calendar year 2013. Cooperatives are classified by principal product marketed and major function. Both gross (includes inter-cooperative business) and net (excludes inter-cooperative business) dollar volumes are reported.

Statistics for 2013 were compiled on a State and national basis. The information was collected by a
mail survey of all organizations identified by USDA Rural Development's Cooperative Programs as farmer, rancher, or fishery cooperatives. Information was requested for the 2013 business year.

USDA's Cooperative Programs conducts an annual census to gain accurate information for assistance purposes. Information obtained from individual cooperatives is combined with data from other cooperatives to maintain confidentiality.

Statistics for all cooperatives were derived by estimating data for non-respondents and combining this information with respondent data. Data from respondents and other sources accounted for 90 percent of the total gross sales of farmer, rancher, and fishery cooperatives in 2013.

USDA depends on the response to its annual survey to develop a detailed and comprehensive set of statistics on cooperatives. The time and effort taken by cooperative staff members to provide information, and the timeliness with which it is furnished, are greatly appreciated by USDA.

## HIGHLIGHTS

There are 2,186 U.S. farmer, rancher, and fishery cooperatives, according to the 2013 survey of marketing, supply, and service cooperatives conducted by USDA Rural Development's Cooperative Programs. This was the highest ever business volume and net income, before taxes, for U.S. agriculture cooperatives, surpassing the previous records set in 2012. U.S. crop production and livestock sales both increased 6 percent in 2013, and production input sales increased 2 percent. Many products had sales declines though, with cotton decreasing the most (-38 percent). Livestock, vegetables, and dairy all had at least a 3-percent gain in U.S. sales. Overall the farm economy saw U.S. sales decline for many crops and production inputs.

- Total gross business volume (includes intercooperative business) handled by cooperatives was $\$ 246$ billion; net business (excludes inter-cooperative business) was $\$ 209$ billion. Both are records, exceeding 2012 by $\$ 8$ billion and $\$ 6$ billion, respectively.
- Net income before taxes (NIBT) was $\$ 6.2$ billion, which includes inter-cooperative dividends and refunds of $\$ 1.2$ billion. This exceeds the 2012 record NIBT by $\$ 46$ million, while dividends and refunds exceeded the prior record set in 2009 ( $\$ 898$ million) by $\$ 300$ million.
- Cooperative memberships were 2 million, down 140,000 from 2012.
- Cooperatives employed 136,000 full-time and 55,000 part-time and seasonal employees. Full-time employee numbers were
up 7,000 from 2012, while part-time and seasonal employee numbers were down by 1,300.
- Gross value of products marketed by cooperatives was $\$ 145$ billion, with a net value (after eliminating duplication from intercooperative business) of $\$ 136$ billion. Both gross and net marketings were up about 2 percent from 2012. Grain and oilseed marketings were up over $\$ 2.5$ billion, while dairy product marketings increased about $\$ 1.4$ billion.
- Gross value of supplies handled by cooperatives was $\$ 96$ billion, with a net value of $\$ 67$ billion. Net supply sales were up almost $\$ 2.5$ billion primarily due to strong energy and feed ingredient prices. Petroleum and feed both had increases of about $\$ 1$ billion in net sales.
- Receipts for services related to marketing farm products and supplies, plus other income, totaled $\$ 5.6$ billion, up about $\$ 860$ million from 2012.
- Cooperatives had about $\$ 83$ billion in combined assets, down about 1 percent from the 2012 record high of $\$ 83.4$ billion. Net assets, after eliminating inter-cooperative investments, were $\$ 77$ billion. Inter-cooperative investments included those in CoBank.
- Total liabilities decreased $\$ 5.3$ billion, to $\$ 48$ billion.
- Net worth, or member and patron equity, was $\$ 35$ billion. Member and patron equity financed 42 percent of total assets, up from 36 percent in 2012.

## Table A: Comparison of 2013 and 2012 Cooperative Statistics

|  | 2013 | $\mathbf{2 0 1 2}$ | Difference | \% Change |

## Cooperative Statistics, 2013

E. Eldon Eversull and Sarah Ali

## I. DEFINITION OF A COOPERATIVE

USDA considers four major criteria in identifying farmer, rancher, and fishery cooperatives:
(1) Membership is limited to persons producing agricultural and aquacultural products and to associations of such producers;
(2) Cooperative members are limited to one vote, regardless of the amount of stock or membership capital owned, or the cooperative does not pay dividends on stock or membership capital in excess of 8 percent a year or the legal rate in the State, whichever is higher;
(3) Business conducted with non-members may not exceed the value of business conducted with members;
(4) The cooperative operates for the mutual interest of members by providing member benefits on the basis of patronage.

These criteria may result in larger or smaller numbers of farmer, rancher, and fishery cooperatives than found in lists or directories of State agencies or cooperative councils. Year-to-year comparisons with specific commodity groups reflect any differences in lists and classifications in State and Federal data.

## Classification of Cooperatives

Cooperative Programs classifies each cooperative under one of the following major functions: marketing, supply, or service. For example, fertilizer cooperatives are classified as supply cooperatives, wool pools are classified as marketing cooperatives, and transportation cooperatives are classified as service cooperatives.

Marketing cooperatives derive most of their total dollar volume from the sale of members' products. Those cooperatives are further classified into 1 of 13 commodities or commodity groups, depending
upon which accounts for most of its business volume. Cooperative Programs may reclassify a cooperative into a different commodity category if its primary business volume changes significantly.

Supply cooperatives derive most of their business volume from the sale of production supplies, machinery and equipment, and building materials. Many also handle farm, ranch, and home items, such as heating oil, lawn and garden supplies and equipment, and food.

Service cooperatives provide specialized services related to the business operations of farmers, ranchers, or cooperatives, such as trucking, storing, or drying.

Many cooperatives handle multiple commodities and provide marketing and supply services, as well as the facilities and equipment used to perform these services. These associations are classified according to the predominant commodity or function, as indicated by business volume.

Prior year data has been revised in this report. Some revisions correct errors; others are due to new information. For instance, 82 cooperatives that had not responded in 2012 included with their 2013 surveys annual reports that also had 2012 information.

## Organizational Membership Structures

Cooperative Programs further classifies marketing, supply, and service cooperatives into three organizational structures according to membership. The membership structures used are centralized, federated, and mixed.

## Centralized Cooperatives

Of the 2,186 cooperatives in 2013, 2,130 were centralized organizations, mostly local cooperatives with individual farmer, rancher, or fishery members. Centralized cooperatives usually serve a local area or community, county, or several counties. Most usually perform a limited number of initial marketing functions. Most supply sales are at the retail level. A few centralized cooperatives, principally regionals, operate over multistate areas and provide

Figure 1: Cooperatives in the United States, 2004-2013

Figure 2: Distribution of Memberships, by Type of Cooperative, 2013

${ }^{1}$ Includes dry bean and pea, bioenergy, wool and mohair, rice, sugar, fishery, and other product marketing cooperatives.

Table 1: Number of cooperatives and memberships, by major business activity, 2013

| Major business activity | Cooperatives Number | Memberships Thousands |

more vertically integrated services, such as processing products or manufacturing feed.

Bargaining associations also have centralized organizational structures. They derive all or most of their business volume from negotiating with distributors, processors, and other buyers and sellers over price, quantity, grade, terms of sale, and other
factors involved in marketing products. Only a few bargain to purchase supplies. While the primary function of such an association is to bring buyers and sellers together to contract for the sale of members' products, many bargaining associations now perform additional functions.

For example, dairy bargaining associations at one time only negotiated price. Now, many perform additional functions, such as physically handling part of the milk for spot sales. Like other dairy marketing cooperatives, these cooperatives represent their members at Federal or State milk marketing order hearings.

## Federated Cooperatives

The 37 federated cooperatives-two or more member associations organized to market products, purchase production supplies, or perform bargaining functions-often operate at points quite distant from their headquarters. Members are usually local cooperatives, although some are interregional associations with regional cooperative members.

## Mixed Cooperatives

The 19 mixed cooperatives have individual farmer, rancher, or fishery members and autonomous cooperative members. These cooperatives use a combination of centralized and federated structures. They serve large geographic areas, with members in many States, and provide a variety of integrated services.

## II. 2013 STATISTICS

Cooperatives' total gross business volume for 2013 was $\$ 246$ billion. Net business volume was $\$ 209$ billion, while net income before taxes (NIBT) was $\$ 6.2$ billion. This was the highest business volume and net income before taxes ever recorded for U.S. agriculture cooperatives, exceeding records set in 2012.

Cooperative sales increases were driven by increased sales in the overall farm economy. U.S. crop production and livestock sales both increased 6 percent in 2013 and production input (farm supply) sales increased 2 percent. Many products had sales

[^0]declines though, with cotton decreasing the most (-38 percent). Livestock, vegetables, and dairy all had at least a 3-percent gain in U.S. sales. Overall, the farm economy saw U.S. sales decline for many crops and production inputs.

Cooperative marketing sales were led by at least a 3-percent sales gain for grain and oilseed and dairy cooperatives, which was a $\$ 4$ billion increase. Supply sales grew by 4 percent over 2012, with petroleum leading the gain with an increase of almost $\$ 2$ billion, and feed grew by $\$ 1$ billion. Crop protectants grew $\$ 500$ million while fertilizer and seed both had declines in sales of less than 1 percent.

In 2013, agricultural cooperatives had 2 million members, with $\$ 83$ billion in assets and a record $\$ 35$ billion in equity. Cooperatives remained a major employer in rural areas, using 136,000 full-time workers.

## Number of Cooperatives

The 2013 survey counted 2,186 marketing, supply, and service ${ }^{1}$ cooperatives, compared with 2,236 in 2012. Of the 2,186 cooperatives, 1,195 primarily marketed products, 871 primarily handled production supplies, and 120 provided services related to marketing or purchasing activities (table 1, appendix figure 1). Revisions have been made to the 2012 data and prior years.

The proportion of marketing, supply, and service cooperatives to the total number of cooperatives remained virtually unchanged from 2012. About 55 percent of cooperatives are marketing cooperatives, 40 percent are supply cooperatives, and 5 percent are service cooperatives (figure 1 and appendix table 1).

There was a net decrease of 50 associations (2 percent) from 2012 to 2013, largely reflecting a continuing trend involving merger, acquisition, or dissolution. The largest decrease was 45 farm supply cooperatives, while dairy cooperatives decreased by 6.
${ }^{1}$ Services include trucking, storage, crop drying, livestock shipping, and similar services affecting the form, quality, or location of products and supplies. They do not include credit, electric, telephone, or other such services not directly related to marketing or supply activities.

Cooperatives are added to the list every year, usually based on press releases from the cooperative or news items, but this probably leads to under-counting. Some cooperatives had been dropped from the list earlier but were added back when USDA was informed that they were still in operation. Most drops occur when two or more cooperatives merge their operations. It is much easier to drop a cooperative from the list than to add one, because undelivered mail is usually returned. If a new address is not found, the cooperative is dropped.

Cooperative numbers based on function (marketing, supply, or service) and State are shown in table 2. Texas had the most marketing cooperatives with 144, while Minnesota was second with 94 . Minnesota had the most supply and service cooperatives with 100, followed by North Dakota with 77.

Many cooperatives operate branches to better serve their members. Most branches are owned by the cooperative, but some are leased. A number of the branches are formerly independent cooperatives that served a local community. For economic or other reasons, many were acquired by, or merged with, other cooperatives and are operated as branches that serve members and patrons at outlying locations.

[^4]Memberships in cooperatives dropped from 2.6 million in 2004 to 2.0 million in 2013 (figure 3). The long term decline largely reflects the decreasing number of farms, farmers, and ranchers in the United States (appendix figure 2). Many farmers and ranchers are members of more than one cooperative, and each membership is counted. Consequently, the number of memberships has long exceeded the number of farms, but now they are slightly less. Duplication in membership cannot be eliminated with current reporting methods.

Member classification depends on the type of cooperative used and may not be related to the member's product(s) marketed or supplies purchased. For example, a member may market only

Grain and oilseed and supply cooperatives operated over 5,000 branches- 2,267 and 2,797 respectively. Grain and oilseed cooperatives averaged almost 5 branches per cooperative while supply cooperatives averaged about 3 .

## Memberships

Memberships in marketing, supply, and service cooperatives were an estimated 2 million in 2013, down 140,000 from 2012 (table 3). There were membership increases in 2011, but generally memberships have been declining, as has the number of U.S. farms. About 65 percent of the memberships were in supply cooperatives, while 20 percent of the memberships were in grain and oilseed cooperatives (appendix table 2, figure 2). Dairy cooperative memberships were only 2 percent of the total, but dairy cooperatives accounted for 19 percent, or $\$ 40$ billion, of cooperatives' net business volume in 2013.
one of the products handled by the cooperative; another may use a cooperative classified in the marketing group to purchase one or more supply items. Therefore, a member's business with a cooperative may not be in the group that represents the cooperative's major business volume (the criterion for classifying cooperatives in this report). The membership, however, will be included arbitrarily in that classification.

During the past decade, membership in marketing and supply cooperatives both declined about 330,000 . Service cooperatives increased memberships by about 15,000 during the same time period.

## Employees

Cooperatives had an estimated 136,000 full-time employees in 2013, an increase of about 7,000 from 2012 (table 4). With sales increasing over the last 3 years, it appears that some cooperatives have added employees. Cotton and grain and oilseed coopera-

Figure 4: Full-Time and Part-Time and Seasonal Employees, by Cooperative Type, 2013

${ }^{1}$ Includes dry bean and pea, nut, bioenergy, tobacco, wool and mohair, and other product marketing cooperatives.
tives both added about 2,000 full-time employees, and sugar and fruit and vegetable cooperatives both added about 1,000.

In 2013, cooperatives employed an estimated 191,000 full-time and part-time and seasonal employees (table 5), about 5,000 more employees than in 2012. Among marketing cooperatives, grain and oilseed had the most employees $(33,200)$, followed by those co-ops that primarily handle fruits and vegetables $(30,500)$ and dairy $(22,000)$.

By type, marketing cooperatives had 115,500 full-time and part-time and seasonal employees ( 60 percent of total); supply cooperatives had 73,600 (39 percent); and service cooperatives had 2,000 (1 percent).

Figure 4 shows the number of full-time and parttime and seasonal employees by type of cooperative for 2013. Supply, grain and oilseed, fruit and vegetable, and dairy cooperatives used the most employees; fish cooperatives had the fewest. Dairy, rice, cotton, and dry bean and pea cooperatives had
the smallest proportion of part-time and seasonal employees to total employees. Cotton ginning and fruit and vegetable cooperatives had more than half of their employees as part-time and seasonal employees, while about 42 percent of sugar cooperatives employees were part-time and seasonal.

Cooperatives used 55,000 part-time and seasonal employees in 2013, down around 1,400 , or 2 percent, from 2012. Grain and oilseed cooperatives decreased their use of part-time and seasonal employees in 2013 by more than 1,000.

In 2013, marketing cooperatives reported having 37,000 part-time and seasonal employees, or 68 percent of the total across all categories. Marketing cooperatives averaged 31 part-time and seasonal employees per operation. Fruit and vegetable cooperatives, with 16,300 , accounted for about 30 percent of all part-time and seasonal employees used by cooperatives. Supply cooperatives had 17,000 part-time and seasonal employees, an average of 20 per cooperative.

Table 6: Cooperatives and memberships, by gross business volume, $2013{ }^{1}$

| Cooperatives | Dollar volume |  | Memberships ${ }^{2}$ |  | Number$(1,000)$ | Percent of total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Sales volume group (million \$) | Number | Percent of total | Gross ${ }^{3}$ <br> (billion \$) | Percent of total |  |  |
| Less than 5.0 | 726 | 33.2 | 1.18 | 0.5 | 172 | 8.7 |

| 10-14.9 | 162 | 7.4 | 1.99 | 0.8 | 87 | 4.4 |
| 15-24.9 | 201 | 9.2 | 4.00 | 1.6 | 150 | 7.6 |
| 25-49.9 | 259 | 11.8 | 9.06 | 3.7 | 217 | 11.0 |
| 50-99.9 | 193 | 8.8 | 13.51 | 5.5 | 177 | 9.0 |
| 100-199.9 | 134 | 6.1 | 18.74 | 7.6 | 169 | 8.6 |
| 200-499.9 | 135 | 6.2 | 31.48 | 12.8 | 329 | 16.6 |
| 500-999.9 | 79 | 3.6 | 30.97 | 12.6 | 146 | 7.4 |
| 1,000 and more | 33 | 1.5 | 133.26 | 54.1 | 392 | 19.8 |
| Total ${ }^{4}$ | 2,186 | 100.0 | 246.11 | 100.0 | 1,977 | 100.0 |

${ }^{1}$ Business volume includes revenues from marketing plus the value of products bargained for or handled on a commission basis, supply sales, service receipts, and other income.
${ }^{2}$ Includes number of farmers, ranchers, and fishermen eligible to vote for directors. Does not include memberships held by other cooperatives, such as local cooperative memberships in regional cooperatives.
${ }^{3}$ Includes inter-cooperative business volume.
${ }^{4}$ Total may not add due to rounding
Most types of marketing cooperatives operated with more employees than did supply cooperatives. For example, sugar cooperatives averaged 437 employees; cotton, 385 ; rice, 225 ; and supply cooperatives, 86 (figure 5).

## Business Size

As measured by annual gross business volume, most cooperatives are relatively small and serve local areas. Some actively seek regional, national, and even international markets to increase business volume. Although few in number, larger cooperatives account for much of cooperatives' business volume. They have grown in size partly from mergers, consolidations, and acquisitions. From 2004 to 2013 , there were 859 fewer cooperatives with less than $\$ 25$ million in sales, while there were 181 cooperatives that moved up into the sales group of more than $\$ 25$ million in sales. The sales group of $\$ 200$ million to $\$ 499.9$ million had the most growth, increasing from 44 cooperatives in 2004 to 135 in 2013 (table 6).

In 2013, 53 percent of all cooperatives reported a business volume of less than $\$ 15$ million. However, they accounted for around 2 percent of the total gross dollar volume (figure 6). About 11 percent of cooperatives reported a business volume of at least $\$ 200$ million, but they accounted for almost 80 percent of the total sales.

## Business Volume

Total gross business volume of the 2,186 marketing, supply, and service cooperatives for 2013 was $\$ 246$ billion (table 7), up about $\$ 8$ billion from $\$ 238$ billion in 2012. Historically, gross business volume fell from a record $\$ 128$ billion in 1996 to $\$ 112$ billion in 2002. However, this has not been a steady decline. Some years saw increases to $\$ 120$ billion, while other years fell to $\$ 115$ billion or less (appendix table 3, appendix figure 4). The historical high in 1996 was almost matched in 2006, then was eclipsed in 2007 through 2013.

Grain and oilseed cooperatives had a gain of more than $\$ 2.5$ billion while dairy cooperatives had an increase of almost $\$ 1.4$ billion. Continued strong grain prices, higher dairy prices and strong energy prices were the main causes of grain, dairy, and supply sales increases. Petroleum products led the supply sales gain, with an increase of $\$ 1.7$ billion. Feed sales increased by $\$ 1$ billion, and crop protectants by almost $\$ 500$ million.

Total net business volume of cooperatives in 2013 was up almost $\$ 3$ billion from 2012 (net sales equal gross sales minus sales between cooperatives). The net volume for 2013 was $\$ 209$ billion, compared to $\$ 203$ billion in 2012. The net sales

Table 7: Cooperatives' gross and net business volumes by commodity, 2013 \& $2012^{1}$

| Commodity | Gross volume |  | Net volume |  |
| :--- | ---: | ---: | ---: | ---: |
|  | 2013 | 2012 | 2013 |  | 2012

Total business $246.109237 .773 \quad 208.557202 .603$

[^5]breakdown was $\$ 136$ billion from products marketed, $\$ 67$ billion from supply sales, and $\$ 6$ billion from services performed and other income sources. The $\$ 209$ billion was the highest total ever (appendix table 4 , appendix figure 5). There have been a number of fluctuations in net business volume during the past two decades. Net volume dropped to around $\$ 100$ billion in 1999 and stayed there until the current upward trend started in 2003, then soared, due to increased grain and oilseed prices and energy costs, from 2007 through 2013. Adjusted for inflation ${ }^{2}$ (where $2011=100$ ), net business volume was $\$ 111$ billion in 2005 and increased to $\$ 172$ billion in 2008 , before falling to around $\$ 136$ billion in both 2009 and 2010. It then increased to $\$ 187$ billion in 2011 and $\$ 209$ billion in 2013 (figure 7).

There was no difference between actual and real net business volume in 2013 because the prices paid for production inputs index was 110 and was almost equal to the prices received for farm products index of 109 .

Net volume of products marketed increased 2 percent from 2012. Net marketing business volume accounted for 65 percent of net cooperative sales in 2013, the same as 2012.

Figure 8 illustrates the leading products marketed by cooperatives based on net marketing business volume. Grain and oilseed led with 49 percent of sales, followed by dairy with 30 percent, and sugar and fruit and vegetable, both with 4 percent.

Net supply volume of $\$ 67$ billion was almost $\$ 2.5$ billion higher than 2012 and accounted for 32 percent of the total net business volume. The leading production goods handled by cooperatives in terms of supply net business volume were petroleum at 36 percent, fertilizer at 21 percent, and feed at 19 percent (Figure 9). Petroleum sales increased by more than $\$ 1$ billion, while feed sales grew by almost $\$ 900$ million.

Receipts for services provided by marketing, supply, and service cooperatives, plus other income, increased by almost $\$ 900$ million, to $\$ 5.6$ billion.
${ }^{2}$ Marketing sales were deflated by the index of producer prices received for "all farm products" (2011 = 100). Supply sales and service receipts and other income were deflated by the index of prices paid by farmers for "production items," excluding interest, taxes, and wages (2011 = 100).

[^6]supply sales in 2013 and 71 percent in 2004.

Gross and net business volumes by State are presented in table 3. Sales are allocated to the State in which the product marketed was originated and the supplies were sold. Minnesota led all States with more than $\$ 31$ billion in gross business volume and almost \$28 billion in net business volume. Iowa was second with almost $\$ 28$ billion in gross business volume and more than $\$ 24$ billion in net cooperative business volume.

## Balance Sheet

The balance sheet of a cooperative states its financial position at the end of a 12-month fiscal year. The balance sheet represents the cooperative's assets, liabilities, member equity, and their mutual relationships. Combined assets for all cooperatives in 2013 were just short

Service receipts and other income represented almost 3 percent of total net business volume.

Marketing sales of four major commodity groups-grain and oilseed, dairy, fruit and vegetable, and sugar-were up from 81 percent of marketing sales in 2004 to 87 percent in 2013 (figure 10). Grain and oilseed sales increased by $\$ 43$ billion, mainly due to price increases. Dairy sales increased by $\$ 12$ billion, while sugar sales grew by over $\$ 2$ billion. Net volume among commodity groups was highest in 2013 for grain and oilseed at $\$ 66$ billion (compared to $\$ 23$ billion in 2004), followed by dairy with $\$ 40$ billion.

Feed and fertilizer are important farm inputs for supply cooperatives (figure 11), but petroleum was especially important in 2013, accounting for $\$ 10$ billion more in sales than either feed or fertilizer. The combination of petroleum, feed, and fertilizer sales accounted for 76 percent of cooperatives' total
of the record $\$ 83$ billion in 2012- only about $\$ 800$ million lower in 2013, at almost $\$ 83$ billion (table 8). Total assets of cooperatives, excluding intercooperative investments, decreased by $\$ 1.3$ billion from 2012, to $\$ 78$ billion in 2013. Cooperatives' total assets grew from $\$ 46$ billion in 2004 to $\$ 83$ billion in 2013 (appendix table 5 and figure 12).

In 2004, 10 percent, or $\$ 4.7$ billion, of total assets was invested in other cooperatives, including CoBank. In 2013, these investments were $\$ 5.2$ billion, up $\$ 500$ million from 2004. This represented 6.3 percent of total assets, 4 points lower than a decade ago.

Of the $\$ 83$ billion in total assets, marketing cooperatives accounted for $\$ 43$ billion, about $\$ 700$ million more than in 2012. Grain and oilseed cooperatives had about $\$ 19$ billion in assets, more than double the assets of dairy cooperatives (\$8.9 billion) and almost four times the assets of fruit

Figure 11: Cooperatives' Net Sales of Selected Supplies, 2004-2013

and vegetable cooperatives ( $\$ 5.1$ billion). All three of these types of marketing cooperatives have less combined assets than supply cooperatives ( $\$ 40$ billion).

Table 9 compares common-size balance sheets for six sizes of cooperatives (for all types and sizes, see appendix table 6). Common-size balance sheets present all accounts as a percentage of total assets, allowing comparison between different sizes and types of cooperatives.

## Current Assets

Current assets are generally comprised of cash and cash equivalents, accounts and notes (with shortterm maturities) receivable, inventories, and prepaid expenses. Current assets were about 62 percent for all sizes of cooperatives, down from 63 percent in 2012. Smaller cooperatives-especially service, most sugar, bioenergy, and cotton ginning coopera-tives-had smaller levels of current assets. Grain and oilseed, livestock, dry bean and pea, and larger cooperatives tended to have higher levels of current assets.

## Investments and Other Assets

Investments were most often in other cooperatives and CoBank. "Other assets" is a catch-all category in this study and contains a wide variety of items. Investments ranged from 9 percent of all assets for small cooperatives up to 13 percent for cooperatives with sales of $\$ 5$ million to $\$ 15$ million. The largest cooperatives accounted for 4 percent of investments. Investments were larger for supply cooperatives than most marketing cooperatives.

All but the largest (intra-state) supply cooperatives generally purchase their inputs from (interstate) regional supply cooperatives, hence the large investments in other cooperatives. Large dairy, smaller fresh fruit and vegetable, service (except fresh fruit and vegetable service), cotton, fish, poultry, nut, tobacco, rice, sugar, and most livestock cooperatives all had low investments levels-often less than 4 percent of all assets.

## Property, Plant, and Equipment

Net property, plant, and equipment (net PP\&E) are tangible assets used by a cooperative's operations. PP\&E averaged between 24 and 31 percent of total assets for all sizes of cooperatives. Biofuels, medi-

[^8]um and large sugar, smaller cotton ginning, smaller fresh fruit and vegetable, small nut, small fish, and service (except dairy, cotton, and fresh fruit and vegetable) cooperatives all had PP\&E of at least 40 percent of their assets.

## Current Liabilities

Current liabilities are all obligations that will be paid with the use of current assets and are usually paid within 1 year. Current liabilities are comprised of notes payable to banks and/or other trade creditors, accounts payable, current maturities of longterm debt, income taxes, other accrued liabilities (payroll, property taxes, interest, and other), patronage dividends payable, and miscellaneous or other current liabilities. Current liabilities were at least 30 percent of total assets and grew to 42 percent for larger cooperatives. Product marketing cooperatives tended to have higher levels of current liabilities than supply and service cooperatives.

Table 11: Cooperatives' net income before taxes, 2013 ${ }^{1}$

| Principal product(s) <br> marketed and | Income <br> before <br> taxes | Net <br> operating <br> margins | Patron- <br> age <br> in- <br> come |

| :--- | ---: | ---: | ---: | ---: |
| Co-ops |

${ }^{1}$ Adjusted for losses and before taxes. Before-tax income is used in this table because historically, after-tax net income was not collected. Totals may not add due to rounding.
${ }^{2}$ Includes patronage refunds from CoBank.
${ }^{3}$ Includes dry edible bean and pea, nut, bioenergy, tobacco, wool, cottonseed, and other marketing.

## Total Liabilities

Total liabilities include current liabilities plus longterm liabilities, which are primarily long-term debt. In the aggregate, all types and sizes of cooperatives had some long-term debt. Smaller cooperatives all had at least 9 percent of their assets financed through long-term debt. Generally, the largest cooperatives used the most debt, financing 21 percent of their assets through borrowing. Nut, large dairy, large fruit and vegetable, small fish, storage, hulling, and farmer market cooperatives all financed about 20 percent or more of their assets with longterm debt.

Total liabilities were $\$ 48$ billion, down $\$ 5$ billion from 2012 (table 10). Cooperatives' total liabilities grew fairly steadily from $\$ 26$ billion in 2004 to $\$ 53$ billion in 2012. Total liabilities financed 58 percent

Figure 12: Cooperatives' Assets, Liabilities, and Net Worth, 2004-2013

of total assets in 2013, about 6 points lower than in 2012.

## Allocated (or Member) Equities

Allocated (or member) equities represent member ownership of each cooperative. Comparing allocated equities to total assets determines the percent of the cooperative's assets owned by members. Allocated equity comprised just 26 percent of ownership of all sizes of cooperatives, up 3 points from 2012. The very largest cooperatives had the smallest percentages of both retained earnings and overall equity.

Net worth, or member and patron equity, was $\$ 35$ billion, up over $\$ 4$ billion from 2012. The proportion of total assets financed by member and patron equity was 42 percent, up 6 percentage points from 2012. Net worth for all marketing cooperatives was $\$ 17$ billion, up over $\$ 2$ billion from 2012. Marketing cooperatives accounted for 51 percent of cooperatives' combined net worth, up almost 2 points from 2012. Net worth for supply cooperatives also totaled $\$ 17$ billion, representing 49 percent of
the total. For marketing cooperatives, the highest percentage of total assets represented by net worth (figure 13) was 64 percent, by service cooperatives. Dairy cooperatives ranked lowest at 33 percent.

## Income Statement

The income statement shows the net results of a cooperative's operations. Because most managers' performance is judged by net income, members attach great importance to the income statement. Table 9 presents a common-size income statement for all cooperatives, based on six sizes. Each item in a common-size income statement is represented as a percentage of total sales or service. Common-size income statements by cooperative type and size are presented in appendix table 6.

## Total (Net) Sales

Total (net) sales are all sales less discounts, returns, and allowances from gross sales. Service cooperatives do not have a total sales value: the first income statement item for these cooperatives is service.

Figure 13: Percentage of Assets Financed by Net Worth, by Cooperative Type, 2013

${ }^{1}$ Includes dry bean and pea, nut, bioenergy, tobacco, wool and mohair, and other product marketing cooperatives.

## Cost of Goods Sold

Cost of goods sold (COGS) includes the beginning inventory plus purchases and freight costs, minus purchase returns and allowances, purchase discounts, and ending inventory. COGS, therefore, was the purchase price of the supplies sold or products marketed. For all sizes of cooperatives, COGS was 91 percent of net sales. COGS can be much lower for cooperatives that process products or provide technical services.

Artificial insemination cooperatives, processed and fresh fruit and vegetable cooperatives, smaller cotton ginning, larger fish, smaller nut, larger rice, and larger sugar cooperatives have a lower COGS. Grain and oilseed, livestock marketing, large poultry, small rice, small sugar, and most dairy cooperatives have a COGS in excess of 90 percent, while large livestock marketing cooperatives that operate mainly as auctions have a COGS of 99 percent.

## Gross Margins

The excess of net sales over the cost of goods sold is the gross margin or gross margin percentage. A
small change in the gross margin can substantially impact net operating margins. A cooperative manager must maintain a gross margin near industry averages. Thus, least-cost sources of supplies need to be developed and marketing cooperatives need to pay market rates on the products they purchase.

Cooperatives are often characterized as businesses that provide goods and services "at cost." However, a cooperative cannot operate at cost on a daily basis. Cooperatives need adequate gross margins to be profitable and to afford to finance essential future-directed discretionary expenditures, such as expansion and advertising.

Gross margin equals net sales less cost of goods sold, so cooperatives with higher COGS had lower gross margins. The COGS was about 1 point higher for the very largest cooperatives than for the other sizes. As discussed earlier, those cooperatives with a low COGS would have high gross margins.

## Service and Other Operating Income

Service and other operating income is derived from any service cooperatives provide. Some coopera-

Figure 14: Cooperatives' Net Income Before Taxes, 2004-2013
Billion dollars

${ }^{1}$ Includes dividends and patronage refunds from other cooperatives and CoBank.
tives only provide services. Service-only co-ops include: rice driers, storage, transportation, auctions, hulling, seed development, locker plants, pest management, scouting, farmer markets, and miscellaneous services. Service income is important to marketing and supply cooperatives. They provide hauling, storage, grading, delivery, custom application, recordkeeping, and drying, to name some of the most common services. Other operating income is generated from sales activities and includes income from providing financing for sales.

For service cooperatives, service is 100 percent on their income statement. By cooperative size, service income is most important for smaller cooperatives ( 16 percent of sales) and diminishes as size increases to cooperatives with over $\$ 500$ million in sales ( 1 percent of sales). Many of the cotton ginning cooperatives have a significant amount of service income; hence service income ranges from 24 percent to 81 percent of sales for these cooperatives.

## Operating Expenses

There are only four categories for expenses in table 9: wages, depreciation, interest, and "all other."

Wages includes salaries and wages, payroll taxes, employee insurance, unemployment compensation, and pension expense. The "all other" account includes administrative expenses, which are overhead costs and indirectly related to a cooperative's revenue. These include professional services, office supplies, telephone, meetings and travel, donations, dues and subscriptions, directors' fees and expense, and annual meetings. The "all other" category also includes general expenses, which are directly related to revenue, such as advertising and promotion; auto and truck delivery; insurance; property, business, and other taxes and licenses; rent and lease expenses; plant supplies and repairs; repairs and maintenance; utilities; miscellaneous; bad debts; and other expenses.

Wage expenses were the highest for smaller cooperatives and fell as cooperative size increased, from 12 percent for the smallest cooperatives, to 3 percent for the largest. Wage expenses were higher for service cooperatives because they are generally small and lack other sales to spread out wage costs. Artificial insemination cooperatives had wage expenses that were more than 41 percent of sales;

| Wyoming | 1 | 613 | 100 |
| United States | 17,758 | 4,076,579 | 96 |

those of smaller cotton ginning cooperatives averaged almost 33 percent of sales. Dairy, grain and oilseed, larger and mid-sized livestock marketing (auctions), bioenergy, large nut, smaller rice, and small sugar cooperatives had lower wage expenses relative to sales.

Depreciation expenses did not change much with cooperative size, ranging from 2 percent for the smallest cooperatives to 1 percent for the largest cooperatives. Smaller cotton ginning cooperatives, small nut, and service cooperatives (except dairy, livestock, fruit and vegetable, and cotton) had depreciation expenses of at least 5 percent of sales. Most livestock cooperatives had little PP\&E, so depreciation expenses were less than 1 percent. Large cotton, most dairy, small and mid-size fruit and vegetable, grain and oilseed, large supply, small fish, small rice, large nut, and small sugar cooperatives also had depreciation expenses of less than 1 percent.

Interest expenses were relatively minor for all sizes of cooperatives, comprising less than 1 percent of total sales. Cotton service, small cotton ginning, farmer markets, and small nut cooperatives had interest expenses greater than 2 percent of sales.

Other expenses fell as cooperatives grew larger. This account is the difference between total expenses and the sum of wages, depreciation, and interest, so it can be overstated when these three accounts are estimated for the few cooperatives that did not break out individual expenses on the survey or in their annual report. As a result, other expenses in this report may be larger than expected.

## Net Operating Margins

Net operating margins is calculated by taking gross margins minus total expenses before taxes, and not counting patronage refunds from other cooperatives. So, it is income generated by a cooperative's own operations. Net operating margins for all cooperatives in 2013 was $\$ 4.9$ billion, excluding intercooperative dividends and refunds (table 11). Net operating margins was about $\$ 300$ million lower than in 2012.

Net operating margins as a percent of net sales was 2 percent for all cooperatives by size (table 9 ). Most service cooperatives (except livestock), arti-
ficial insemination, large processed and fresh fruit and vegetable, smaller to large supply, larger fish, cotton ginning, nut, and dry bean and pea cooperatives had net operating margins of at least 3 percent. Dairy, small fresh fruit and vegetable, large cotton, large poultry, smaller grain, small supply, livestock, livestock service, small fish, and small sugar marketing cooperatives had net operating margins of less than 1 percent.

## Patronage Income

Patronage refunds received (usually income from other cooperatives) results from business activities with other cooperatives, generally regionals, or CoBank, a cooperative bank. The patronage refund from regionals was based on business volume and consisted of cash refunds and equity stock. Stock was usually revolved back to the local cooperative on a set schedule. Many cooperatives that borrowed funds from CoBank received both cash and noncash patronage income. The non-cash patronage from CoBank was from investment in the bank, which was usually required in proportion to the funds borrowed.

Patronage refunds received from other cooperatives, including CoBank, totaled $\$ 1.2$ billion, up 33 percent from $\$ 900$ million in 2012 (appendix figure 6). In 2004, refunds from other cooperatives were $\$ 330$ million or about one-fourth of the refunds in 2013. In 2013, refunds were almost 20 percent of net income before taxes.

Patronage refunds were a little less than 2 percent of sales for the smallest cooperatives, and fell to 0.2 percent for the largest (table 9). All cotton ginning cooperatives had patronage refunds of almost 2 percent of sales. All but the largest cotton ginning (sales in excess of $\$ 10$ million) had patronage income of almost 4 percent of sales. Livestock, fish, large poultry, bioenergy, nut, rice, tobacco, wool, sugar, storage, milk service, and hulling cooperatives received virtually no patronage refunds ( 0.1 percent of sales).

## Non-Operating Income

Non-operating income is income not generated by sales. It could be interest from investments. It also could come from the sale of PP\&E, rentals, and

Figure 15: Before Taxes Net Income or Loss, by Type of Cooperative, 2013

extraordinary items. Sometimes PP\&E are sold to generate income, but usually these types of assets are fully depreciated. When sold, if the market value is greater than the book value, income is generated. In some cases, disposal of a fully depreciated asset may mean a loss. Rental income from unused facilities or equipment provides income flows. Sales of extraordinary items might generate either a gain or a loss. A gain could result from a fire loss where the insurance settlement was greater than the book value. A loss might occur from flood damage for which the cooperative had no coverage. For all sizes of cooperatives, non-operating income averaged less than 0.5 percent of sales.

## Net Income Before Taxes

Net income before taxes (NIBT) was $\$ 6.2$ billion, an increase less than of 1 percent from $\$ 6.1$ billion in 2012. Net income in 2013 was over 2.5 times the NIBT of $\$ 2.3$ billion in 2004 (appendix table 7 and figure 14).

Marketing cooperatives' NIBT of $\$ 2.6$ billion was up 4 percent from the $\$ 2.5$ billion generated in 2012. Dairy, fruit and vegetable, and rice were the only major types of marketing cooperatives with an increase in net income before taxes.

Total NIBT of supply cooperatives was $\$ 3.5$ billion in 2013, down $\$ 100$ million from $\$ 3.6$ billion in 2012 (figure 15). Supply cooperatives accounted for 57 percent of cooperatives' NIBT in 2013, down from the almost 59 percent in 2012 (appendix figure 7).

Losses totaled \$213 million in 2013, a 25-percent decrease from 2012. Cotton cooperatives accounted for 59 percent of the losses in 2013, while dairy cooperatives had 58 percent of the losses in 2012 (appendix figure 8). The number of cooperatives with losses declined 1 percent, from 225 to 222.

## Income Taxes

Cooperatives paid income taxes on earnings not allocated to members (retained earnings) and on
dividend payments. The board of each cooperative determined what amounts of income were allocated to retained earnings and to members. Non-member business has an impact on retained earnings because cooperatives can allocate the earnings to non-members or retain the income. Cooperatives paid $\$ 600$ million in income taxes.

## Net Income

Net income after taxes (net operating margins plus patronage refunds and non-operating income, minus taxes) was the highest for smaller cooperatives (4.6 percent) and fell to 2 percent for the largest cooperatives. The following co-op sectors had net incomes of greater than 5 percent: cotton service, most cotton ginning, larger processed and fresh fruit and vegetable, small artificial insemination, middle supply, small nut, large sugar, rice drier, small transportation, storage, hulling, and fresh fruit and vegetable service cooperatives.

Cotton, livestock service, larger dairy, small supply, small grain and oilseed, most livestock, smaller fish, small rice, wool, and large poultry cooperatives had net income relative to sales of less than 1 percent.

## Selected Financial Ratios

Financial ratios express relationships between items in the balance sheet and income statements of a business operation. They help in analyzing a cooperative's economic and financial situation. Ratios can indicate problem areas, serve as guidelines for planning, and aid in formulating actions. However, ratio interpretation is largely subjective.

Nine financial ratios were used to measure cooperative performance or financial condition: current, debt-to-asset, debt-to-equity, retained earnings-to-total-equity, equity-to-assets, adjusted equity-toassets, return-on-assets, return-on-member equity, and extra value index.

The formulas for these ratios are:

- Current = current assets / current liabilities;
- Debt-to-asset $=$ debt $/$ total assets $(\operatorname{debt}=$ all liabilities);
- Debt-to-equity $=($ debt $/$ total assets $) /$ (equity / total assets);
- $\quad$ Retained-earnings-to-total-equity $=$ retained earnings / total equity;
- Equity-to-assets = total equity $/$ total assets;
- Adjusted equity-to-assets = total equity / (total assets - current liabilities);
- Return-on-assets-before-interest-and-taxes = (NIBT + interest expense) / total assets;
- $\quad$ Return-on-member-equity $=$ net income $/$ allocated equity;
- Extra value index = net income after taxes (total equity * $\left(\mathrm{LIBOR}^{3} 12\right.$ month maturity December average $+\mathrm{X} \%$ ) ) / (total assets - current liabilities), where $X=2$ is a basic premium for risk; $X=5$ is a moderate level of risk, and $X=10$ is a high level of risk.

## Liquidity Ratio

The current ratio is a liquidity ratio-a measure of the cooperative's ability to meet short-term obligations. It focuses on the cooperative's ability to remain solvent. However, this ratio does not consider the degree of liquidity of each of the current asset components. If the current assets of a cooperative were mainly cash, they would be much more liquid than if comprised mainly of inventory.

If the ratio is less than one, current liabilities exceed current assets and the cooperative's liquidity is threatened. Improvements can be achieved by selling additional capital stock, borrowing additional long-term debt or disposing of unproductive fixed assets and retaining proceeds. Current liabilities may also be reduced by retaining a greater portion of allocated savings (reducing the cash portion).

A high current ratio is a favorable condition financially because it indicates the ability to pay current liabilities from the conversion of current assets into cash. Operationally, this same high ratio tends to increase operating freedom and reduce the probability of bill-paying difficulty from write-downs of accounts receivable or inventory. The current ratios of six sizes of cooperatives are shown in table 9 (for all types and sizes, see appendix table 6). By size, the ratio is always less than, or equal to, 1.7, meaning current assets exceed current liabilities by 1.7 times or less.

[^9]If necessary, these current assets could be sold to cover all short-term liabilities and the cooperative would still have some liquid assets left. By type, the current ratio exceeds 2 for small artificial insemination, large processed and fresh fruit and vegetable, large poultry, large nut, rice, tobacco, wool, bioenergy, small transportation, dairy service, and storage cooperatives.

## Leverage ratios

Leverage ratios look at the long-term solvency of the cooperative and help analyze the use of debt and the ability to meet obligations in times of crisis. Debt-to-asset-ratio shows the proportion of debt used to finance assets. Reducing debt, increasing savings, or financing a greater portion of assets with working capital may improve this ratio.

Generally, larger cooperatives relied on the use of more debt financing. Debt financing was used for at least 43 percent of assets owned by cooperatives with sales of less than $\$ 5$ million and rose to 61 percent for the largest cooperatives. Small artificial insemination, bioenergy, large sugar, small transportation, milk service, and tobacco cooperatives used debt financing for one-third or less of their assets.

Debt-to-equity-ratio shows the financial flexibility and the long-term capital structure of the cooperative. High ratios indicate inadequate borrowing power. A low ratio is more favorable and financially makes the cooperative more independent of outside sources of funds because owners' equity is available. A low ratio may indicate low return on equity. Operationally, a low ratio tends to reduce interest cost. Improvement may be gained by disposing of unproductive assets and using proceeds to liquidate debt, or by accelerating payments on long-term loans. Cooperatives may also try increasing local equity by generating higher levels of net operating margins, slowing down equity retirement programs, selling additional capital stock, or retaining more allocated savings.

As cooperative size increases, so does use of debt. The ratio was 0.8 for the smallest cooperatives, climbing to 1.6 for the largest cooperatives. Artificial insemination, most cotton ginning, small dairy, smaller fresh fruit and vegetable, smaller processed and fresh fruit and vegetable, large-to-small supply, smaller mixed supply, poultry, bioenergy, rice, tobacco, larger sugar, and most service coop-
eratives all had a ratio of less than 1 .
The ratio of retained-earnings-to-total-equity shows the use of retained earnings and allocated equity. Net income from non-member business is the usual source of retained earnings (unallocated equity). Operationally, the ratio can be improved by increasing equity or holding less retained earnings.

For all but the largest and smallest cooperatives, retained-earnings-to-total-equity is greater than 30, meaning the cooperative has about one-third of total equity comprised of retained earnings. This ratio increases as cooperative size increases for all but the largest cooperatives, for which the leverage ratio is 31 percent. The smallest cooperatives have retained earnings of 27 percent relative to total equity. Cotton ginning, large and smaller dairy, small and larger processed and fresh fruit and vegetable, small fish, larger and small sugar, and most service cooperatives have retained-earnings-to-total-equity ratios of less than 20 percent.

## Solvency Ratios

Solvency ratios look at the long-term solvency of the cooperative and help analyze the use of equity and the ability to meet obligations in times of crisis. The ratio of equity-to-assets measures the use of equity to finance the cooperative and can be considered a measure of solvency or financial strength of the cooperative. The ratio is the inverse of the previously described debt-to-asset ratio (equity-to-assets ratio $=1$ minus debt-to-asset ratio) .

Smaller cooperatives are generally stronger financially because they finance a larger proportion of their assets with their own equity. The equity-toassets ratio ranges from 57 for the smallest cooperatives to 39 for the largest. With an equity-to-assets ratio of 39 , about 40 percent of a cooperative's assets is financed by equity, and 60 percent is financed by debt. Small livestock, small cotton ginning, small dairy, smaller farm supply, bioenergy, small rice, tobacco, transportation, milk service, and livestock service cooperatives all have an equity-toassets ratio in excess of 60 .

Another measure of solvency or financial strength is shown by the adjusted equity-to-assets ratio, where total equity is divided by total assets, minus current liabilities. When current liabilities are subtracted from assets, the remainder is long-term debt and total equity, so the ratio shows the relative use
of long-term debt and equity to finance the cooperative. A higher ratio indicates higher solvency or a greater use of equity to finance operations. Operationally, reducing long-term debt or increasing equity strengthens this ratio.

Small cooperatives have an adjusted equity-toassets ratio of 82 , but this ratio falls to 67 for the largest cooperatives, indicating that larger cooperatives use more long-term debt. Smaller dairy, small fresh fruit and vegetable, small fresh and processed fruit and vegetable, smaller supply, smaller mixed supply, smaller livestock, bioenergy, small rice, larger sugar, small transportation, cotton service, milk service, and livestock service cooperatives have an adjusted equity-to-assets ratio of at least 85 .

## Profitability Ratios

Profitability ratios indicate the efficiency of the cooperative's operations. Because a cooperative is owned by its user-members, many common industry profitability ratios have little meaning. For instance, profitability ratios measuring the return on common or preferred stock of similar investororiented firms are not appropriate because there is seldom an open market for cooperative stock.

Return-on-assets-before-interest-and-taxes measures the rate of return on total investment. This ratio is a measure of performance. It is not sensitive to the leverage position of the cooperative. Although some assets were financed through debt, the ratio measures return to both members and lenders.

Operationally, a high ratio tends to reduce interest cost and indicates a comparatively high rate of return on assets employed. This ratio rose from 7 for the smallest cooperatives to almost 9 for middle-size cooperatives, and almost 9 for the largest cooperatives. It is at least 15 for most cotton ginning, small sugar, rice drier, smaller fish, large fresh and processed fruit and vegetable, and hulling cooperatives.

Return-on-member-equity represents members' investment in their cooperative. It is an important measure of profitability. This ratio is sensitive to the amount of debt capital in the cooperative, and it is best used in conjunction with other measures, such as the return on assets. Financially, a high ratio is favorable and tends to decrease financial leverage. However, a high ratio may also be a symptom of
insufficient investment. A high ratio tends to reduce interest cost over time but may occur when both total debt and interest costs are high.

By size of cooperative, the highest return-on-member-equity was over 30 percent for cooperatives with $\$ 100$ million to $\$ 500$ million in sales. The smallest cooperatives have higher proportions of member equity, and thus a lower ratio of 14. Small nut, large supply, middle livestock, small fish, large and small sugar, and hulling have a 45-percent or greater return-on-member-equity ratio.

## Extra-Value Index

The extra-value index (EVI) can help members evaluate their cooperative's performance, because it provides a value for the opportunity cost of using equity capital [Liebrand]. A cooperative's equity capital is not openly traded in a stock market as that of an investor-oriented firm, so it is hard for cooperative members to determine if management is increasing or decreasing the value of the cooperative. The EVI attempts to put a value on the opportunity cost of equity capital through the use of an interest charge on the equivalent to the amount the money (member equity capital) could have earned if used elsewhere. In other words, EVI evaluates cooperative performance by subtracting the opportunity cost of equity capital from the profitability ratio.

If the EVI is positive, cooperative management has created value for members because the cooperative's operations are covering the opportunity cost of member's equity capital. The converse is true if the EVI index is negative-member's investment in the cooperative is being diminished because the opportunity cost of member's equity capital is not being covered.

There are three values shown for EVI in table 9. The EVI +2 represents a basic rate by adding 200 basis points to the London Inter-Bank Offered Rate (LIBOR) 12-month maturity December average, which was 0.58 for December 2013. The basic LIBOR +2 rate represented in table 9 as EVI+2 (2.58) reflects the rate that banks in the United States might make loans to firms with better-than-average credit ratings. EVI +5 (5.58) represents a moderate premium for risk or LIBOR rate plus 500 basis points, while EVI $+10(10.58)$ is a higher premium for risk as it is LIBOR rate plus 1,000 basis points.

Smaller cooperatives, which generally have a larger proportion of equity relative to assets, have a lower EVI. For EVI+2, small cooperatives generated 6.2 cents of extra value for each $\$ 1$ of member equity investment. For the higher risk of EVI +10 , smaller cooperatives had a negative return of 0.3 cents.

For EVI+2, rice drier, middle livestock, large cotton ginning, smaller fish, small sugar, and hulling cooperatives all had EVIs of at least 20 cents (Appendix Table 6). The EVI used in these tables was the same for all cooperatives. The LIBOR rate is a proxy for a cooperative's cost of capital, since the cooperative would know this value, and it could be plugged into the formula to generate its individual EVI.

## Other Service Cooperatives

## Dairy Herd Improvement Associations

Dairy Herd Improvement Associations (DHIA) had 17,836 memberships in 2013 (Table 12), down from 18,579 in 2012. The DHIA tested nearly $4,092,281$ million cows in 2013, down from $4,133,140$ million in 2012 . Wisconsin $(4,161)$, Pennsylvania $(3,651)$, Minnesota $(1,704)$, and New York $(1,618)$ combined accounted for 38 percent of total members. About 913,104 (22.3 percent) of
the cows tested were in California, down from 22.9 percent in 2012.

## Rural Electric Cooperatives

The number of rural electric cooperatives increased from 860 to 902 from 2011 to 2012. The top three States with the most number of rural electric cooperatives were Texas (69), Minnesota (44), and Georgia (43). Revenue and the number of members for rural electric cooperatives also increased from 2011 to 2012. Revenue in 2011 was $\$ 40,314,000$ and increased in to $2012 \$ 41,508,000$. The number of members in 2011 was $19,005,000$ and decreased in 2012 to $18,633,313$.

## APPENDIX TABLES

Appendix Table 1: Number of cooperatives, by major business activity, 2013-2009

| Major business activity | 2013 | 2012 | 2011 | 2010 | 2009 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Products marketed: |  |  | Number |  |  |
| Bean and pea (dry edible) | 5 | 5 | 5 | 5 | 6 |
| Cotton | 12 | 12 | 12 | 12 | 12 |
| Cotton ginning | 148 | 151 | 153 | 160 | 166 |
| Dairy | 127 | 133 | 131 | 138 | 140 |
| Fish | 39 | 39 | 38 | 37 | 35 |
| Fruit and vegetable | 145 | 144 | 144 | 137 | 144 |
| Grain and oilseed ${ }^{1}$ | 490 | 488 | 525 | 515 | 548 |
| Livestock | 91 | 87 | 86 | 81 | 79 |
| Nut | 18 | 19 | 18 | 17 | 16 |
| Poultry ${ }^{2}$ | 12 | 11 | 10 | 10 | 10 |
| Rice | 12 | 12 | 12 | 12 | 14 |
| Sugar ${ }^{3}$ | 27 | 27 | 26 | 27 | 31 |
| Tobacco | 5 | 6 | 6 | 8 | 9 |
| Wool and mohair | 41 | 43 | 45 | 54 | 57 |
| Other marketing | 23 | 23 | 26 | 25 | 26 |
| Total marketing | 1,195 | 1,200 | 1,237 | 1,238 | 1,293 |
| Total supplies | 871 | 916 | 934 | 973 | 990 |
| Total services | 120 | 120 | 123 | 116 | 123 |
| Total | 2,186 | 2,236 | 2,294 | 2,327 | 2,406 |

${ }^{1}$ Cooperatives primarily handling grain and oilseed, excluding cottonseed.
${ }^{2}$ Cooperatives primarily handling eggs, turkeys, ratite, squab, and related products.
${ }^{3}$ Cooperatives primarily handling sugar beets, sugarcane, honey, and related products.

Appendix Table 2: Cooperative memberships, by major business activity, 2013-2009

| Major business activity | 2013 | 2012 | 2011 | 2010 | 2009 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Products marketed: | Thousands |  |  |  |  |
| Bean and pea (dry edible) | 1.8 | 1.9 | 1.8 | 1.8 | 1.7 |
| Cotton | 25.1 | 18.8 | 25.4 | 28.2 | 29.2 |
| Cotton ginning | 24.8 | 25.4 | 26.6 | 25.7 | 25.8 |

1 Totals may not add due to rounding. Excludes income from cooperative pooling operations.
${ }^{2}$ Dividends and patronage refunds received from other marketing, supply, and service cooperatives, and CoBank, where applicable.

## APPENDIX FIGURES

## Appendix Figure 1: Distribution of Cooperatives by Type, 2013

Percentages are based on a total of 2,186 cooperatives.
${ }^{1}$ Includes dry bean and pea, nut, wool and mohair, tobacco, rice, sugar, fishery, and other product marketing cooperatives.

Appendix Figure 2: U.S. Farms and Cooperative Memberships, 1979-2013
Million

## Appendix Figure 3: Distribution of Full-Time Employees by Cooperative Type, 2013

[^11]${ }^{1}$ Includes dry bean and pea, nut, wool and mohair, tobacco, fishery, and other product marketing cooperatives

Appendix Figure 4: Cooperatives' Gross and Net Business Volumes, 1979-2013
Billion dollars

Appendix Figure 5: Cooperatives' Net Business Volume, 1979-2013
Billion dollars

## Appendix Figure 6: Cooperatives' Investments in Other Cooperatives and Patronage Refunds Received From Other Cooperatives, ${ }^{1}$ 2003-2013

Billion dollars

Appendix Figure 7: Distribution of Net Income Before Taxes, 2013

Percentage based on net income before taxes of $\$ 6.2$ billion.
${ }^{1}$ Includes dry bean and pea, nut, bioenergy, wool and mohair, tobacco, fishery, and other product marketing cooperatives.

## Appendix Figure 8: Distribution of Losses by Cooperative Type, 2013

Percentage based on before taxes losses of $\$ 212.8$ million.
${ }^{1}$ Includes dry bean and pea, nut, bioenergy, wool and mohair, tobacco, fishery, and other product marketing cooperatives.

[^0]:    ${ }^{1}$ Includes States with fewer than 3 cooperatives for any function. States with at least three cooperatives were: Alaska, 5; Connecticut, 6; Delaware, 3; Maine, 22; New Jersey, 11; New Mexico, 9; South Carolina, 3; and Vermont, 3.

[^1]:    ${ }^{1}$ Includes centralized and federated cooperatives and those with mixed organizational structures. Headquartered in the State listed.
    ${ }^{2}$ Includes voting farmer-members, but not nonvoting patrons. (Duplication in these membership figures occurs because many farmers belong to more than one cooperative.) Memberships include members of cooperatives not headquartered in the State listed. Totals may not add due to rounding.
    ${ }^{3}$ Data covering operations of cooperatives for fiscal years ended in 2013. States listed are those with more than two cooperatives or where disclosure was not a problem.
    ${ }^{4}$ Gross business volume includes sales between cooperatives.

[^2]:    ${ }^{12}$ Headquartered in State and membership values are not collected for individual supply products; rather, they are collected for total supplies.

[^3]:    ${ }^{13}$ Includes all types of petroleum products and lubricants as well as bioenergy fuels such as ethanol and biodiesel.

[^4]:    ${ }^{1}$ Totals may not add due to rounding.
    ${ }^{2}$ Includes nut, bioenergy, tobacco, wool, and other product marketing cooperatives.

[^5]:    ${ }^{1}$ Gross includes and net excludes inter-cooperative business. Totals may not add due to rounding.
    ${ }^{2}$ Excludes cottonseed. Cottonseed oil is included in other marketings whereas cottonseed meal is included in feed.
    ${ }^{3}$ Includes eggs, turkeys, ratite, squab, and related products.
    ${ }^{4}$ Includes cotton ginning, coffee, forest products, hay, hops, seed marketed for growers, nursery stock, ethanol, other farm products not separately classified, and sales of products not received directly from member patrons. Also includes manufactured food products and resale items marketed by cooperatives.
    ${ }^{5}$ Includes artificial insemination, building materials, containers and packaging supplies, machinery and equipment, meats and groceries, automotive supplies, hardware, chicks, and other supplies not separately classified.
    ${ }^{6}$ Includes trucking, storage, grinding, application, locker plants, and other related items. Services include charges related to marketing or purchasing, but not included in the volume reported for those activities, plus other income and extraordinary items.

[^6]:    ${ }^{1}$ Totals may not add due to rounding.
    ${ }^{2}$ Many cooperatives have multi-product and multi-functional operations. Most are classified according to predominant commodity or function as indicated by business volume.
    ${ }^{3}$ Also includes investments in CoBank.
    ${ }^{4}$ Includes dry edible bean and pea, nuts, tobacco, wool, and other marketing.

[^7]:    ${ }^{1}$ Property, plant, and equipment

[^8]:    ${ }^{1}$ Totals may not add due to rounding.
    ${ }^{2}$ Includes dry edible bean and pea, nut, bioenergy, tobacco wool, cottonseed, and other marketing.

[^9]:    ${ }^{3}$ London Interbank Offered Rate

[^10]:    ${ }^{1}$ Includes investments in other cooperatives and CoBank, where applicable.

[^11]:    Percentages are based on a total of 136,000 full-time employees
